Terms & Conditions

Partner Terms and Commercial Conditions

- Commercial discounts and partner conditions are defined in individual Hem Partner Terms.
- Please contact your Hem representative for applicable partner terms and pricing conditions.

Payment Terms

- Default payment terms are Cash in Advance (CIA).
- Alternative payment terms may be approved on request and are subject to credit review and written agreement.

Availability & Lead Times

- Hem maintains EU inventory of selected products and finishes, allowing for quicker fulfillment where available.
- Product availability and lead times are confirmed upon quotation. Please reference hem.com for real-time inventory availability, or reach out to orders@hem.com.

Incoterms & Delivery

- Deliveries are made Delivered At Place (DAP), unless otherwise agreed in writing, meaning the buyer is responsible for unloading and any applicable local VAT.
- EXW (Ex Works) is available on request and subject to approval.

Express freight is available on request and charged at cost.

Shipping and Duties

- Flat freight: €149 per order
- Flat parcel: €49 per order
- Free freight for orders above €2,000 net

Custom Program

- Graded-In Textile and Custom products are produced on demand.
- Applicable lead times are confirmed upon quotation.

Order Changes and Cancellations

- Orders may be cancelled or amended within 48 hours of written order confirmation.
- After this period, orders are binding and cannot be cancelled unless approved by Hem.

Delivery Delays and Storage

- If delivery is delayed at the customer's request, Hem may store goods for a limited grace period.
- Extended delays may result in storage fees, additional handling costs, or delivery at the customer's cost.
- Open-ended delivery holds should be avoided and require Hem's approval.
- For EXW orders, goods must be collected within a commercially reasonable period after Hem's ready-for-pickup notification.
- Storage fees and additional handling or delivery costs may apply for delayed pickup.

Quotes and Pricing

- Quotes are valid for 30 days unless otherwise stated.
- Hem reserves the right to adjust prices due to currency fluctuations, material cost changes, or supplier increases.

Digital Tools and Samples

- The Hem Pro portal can be used to:
 - Place orders and create quotes
 - View stock levels
 - Access CAD and Revit files
 - Order material samples

Legal Disclaimer

- Hem reserves the right to alter prices without prior notice and correct any errors in price lists or documentation.
For full terms and conditions, please reference <https://pro.hem.com/en-eu/terms-and-conditions>

Chairs

Stools

From the ultimate easy chair to the perfect bistro chair, we've engineered a collection of seating for every situation and every interior, making sure you are always supported in comfort and style.

All Wood Stool Rocket & Bobbin

Design by Karoline Fesser

Like a good friend, the All Wood Stool is easy to be around. This functional piece of occasional furniture can be a side table, a seat, or a platform on which to display your favorite things. Adjust its height whenever you like with a simple turn of its screw mechanism. Designer Karoline Fesser nods to midcentury icons such as the Eames Time Life stool as well as functional workshop furniture like sculptors' tables. As its name implies, this piece is made from solid ash or walnut wood, CNC cut, and lacquered. Choose from two shapes, Rocket or Bobbin.

Bullnose Chair

Design by Marco Campardo

Dining just got more interesting. Gently rounded beech wood sections lend the Bullnose Chair, by Marco Campardo, an unexpectedly distinct quality: robust but soft, imposing yet inviting. It has a read-me-like-a-book construction of wooden parts, with each element carefully calibrated for strength and comfort. Deftly handled angles and subtly placed curves improve sitting ergonomics. As well as being the perfect perch for endless dinners, the Bullnose Chair brings visual interest to the table. Pair it with an understated surface for an interior pick-me-up, line them up banquet-style for architectural effect, or carefully position just one or two for small space impact. The Bullnose Chair is available in different shades of stained beech.

Bullnose Lounge Chair

Design by Marco Campardo

Low-slung, deeply inclined, gently rounded, the Bullnose Lounge Chair demands you take a break. This solid wood chair shares all the same qualities as its dining sibling, but is altogether more, well, relaxed. The bullnose-shaped wooden sections that characterize this seating series by Marco Campardo are as distinct and impactful as ever, lending the chair a unique profile and making it extremely robust and sturdy. A deep and wide seat makes for comfortable lounging. Choose the Bullnose Lounge Chair for extensive loafing, long-play days and stylish lounge sessions. The Bullnose Chair is available in different shades of stained beech.

Chop Chair

Design by Philippe Malouin

The Chop Chair by Philippe Malouin is an evergreen design conceived for use in a range of public and private outdoor spaces. Beautifully proportioned, with subtle curvatures, it is intentionally simple, in both construction and style. Chop reimagines a classic slatted-chair archetype to create a silhouette that is immediately recognizable, yet pleasingly unknown. The idea for the design was influenced by Malouin's work in the art world, where he often utilizes hand-led industrial techniques to develop striking forms that accentuate the object's materiality. The Chop collection is cut, bent and welded from durable stainless steel, and is available in a raw, sandblasted or powder-coated colored finish. A design for all seasons, Chop is correctly weighted to resist wind, while still being light enough to move around and stack with ease.

Experiment Lounge Chair

Design by Yrjö Kukkapuro

Timeless, bold, and as compelling today as the day it was created, the Experiment Chair was designed by celebrated Finnish designer Yrjö Kukkapuro in 1982. Its expressive, innovative design was realized during a period of intense productivity by Kukkapuro, then a leading figure of Functionalism. The chair is an icon of eighties design. It demonstrates all the ergonomic qualities and extraordinary structural detail Kukkapuro is famed for. And, importantly, it embodies a fearless postmodern aesthetic that hasn't lost any of its impact. In the Experiment Chair, Kukkapuro sought to add art to Functionalism, to satisfy romantic tastes alongside meeting essential needs. The result is startling, authentic, a hero of twentieth-century design. It has been Hem's privilege to work alongside Yrjö to reintroduce the Experiment Chair to a new generation. The updated Experiment Chair is faithful to the original, featuring the same decorative armrests; red symbolizing fire, green representing trees, and blue denoting waves on a lake. New upholstery options are available, and the chair features subtle resizing tailored to contemporary needs.

Great Sofa - Product Details

Design by Philippe Malouin

The Great Sofa lives up to its monumental name. Great in scale; more landscape than furniture, an expansive archipelago of soft upholstery upon which to retreat. Great in looks; the sofa broadcasts its relaxez-vous informality with loose-fit covers that adapt to your body, crumple and cosset - nothing is uptight or rigid about Great Sofa. Great Sofa excels in concept too; easy-to-fit-and-remove covers aid effortless cleaning and offer longevity. No tools are needed for assembly. Plus, our modular system facilitates endless configurations for laidback, feet-up luxury. Corners, islands, conversation pits welcome.

Upholstery <i>Cifrado</i> by Kvadrat/Sahco (Denmark) 42% recycled polyester, 27% viscose, 24% recycled cotton, 7% linen 30,000 Martindale Pilling 5 Lightfastness 5-6 Flame resistance EN 1021: Part 1 & 2, US Cal. Hai Lounge Chair

Design by Luca Nichetto

The Hai Chair does everything a classic armchair does and more. Luca Nichetto's design is strong—very strong—ergonomic, and handsome, but smart about it. A lightweight metal skeleton is covered in molded foam and soft, inviting textile for maximum comfort. Although sleek and contemporary, the wide arms and high back embrace the sitter in a way that inspires total, classic relaxation. The Hai Chair's sleek looks can be admired from every angle, even from behind, making this an armchair that nobody should push into a corner.

Hunk Lounge Chair with Armrests

Design by Kwangho Lee

The elemental block-like form of the Hunk armchair is especially characteristic of designer Kwangho Lee. In fact, the Hunk Chair is extra in every way. With exaggerated proportions, a profile so chunky it would make The Flintstones blush, and a ground-breaking construction made entirely from natural materials, Hunk is a whole lot of easy seating and conscientious furniture design. Although geometric in form, the chair's deep natural upholstery is made for melting into - natural latex and coco mat provide extreme cushioning whilst a fine bouclé textile creates a super-soft finish. Hunk is destined for lounging greatness.

Upholstery <i>Tiree</i> by Bute Fabrics (Scotland) 92% Pure New Wool, 8% Nylon 50,000 Martindale Pilling 3-4 Lightfastness 5-8 Flame resistance EN 1021: Part 1 & 2, BS 5852: Part 1 & 2 (Crib 5), US Cal. Kendo Bar Chair

Design by LucidiPevere

The Kendo Chair's soft, wrap-around upper offers an appealingly ergonomic seating experience. Simultaneously protective and inviting, this design by LucidiPevere offers a shielding shape combined with a gentle embrace. The generous seat is wide and comfortable, allowing you to move freely, shift position, express yourself. Whether around a boardroom or a dining table, Kendo keeps you comfortable for long periods of time. Its sturdy welded frame makes this chair built to last. A barstool and bar chair complete the Kendo family.

4-star Return

Design by LucidiPevere

The Kendo Chair's soft, wrap-around upper offers an appealingly ergonomic seating experience. Simultaneously protective and inviting, this design by LucidiPevere offers a shielding shape combined with a gentle embrace. The generous seat is wide and comfortable, allowing you to move freely, shift position, express yourself. Whether around a boardroom or a dining table, Kendo keeps you comfortable for long periods of time. Its sturdy welded frame makes this chair built to last. A barstool and bar chair complete the Kendo family.

Last Stool

Design by Max Lamb

The Last Stool is one of our most beloved and most enduring products. Designer Max Lamb set out to make the “last” stool—the most durable, most elemental, most functional, most definitive object. The stool is spun from a single sheet of metal, making it incredibly strong, and each has a wide indentation for easy lifting and movement. The Last Stool is for sitting—it works around every type of table and in every kind of interior—but consider it as a handsome occasional table, too. Choose between beautiful copper or brass, whose surface will elegantly patina over time; single-color enamel for an immediate chromatic punctuation mark; or a hand-splattered enamel finish, where each stool is unique.

Material Steel Enamelled High Gloss Copper Polished Brass Polished Country of origin Enameled: Poland Polished Brass & Copper: Italy Tests & certifications ANSI/BIFMA X5.1-2017 American National Standard For Office Furnishings – General Purpose Office Chairs EN 16139:2013, Furniture - Strength, durability and safety - Requirements for non domestic seating Test severity L2: Extreme use: E.g. in night-clubs, police stations, transport terminals, sport changing rooms, prisons, barracks (non-controlled areas). Puffy Lounge Chair

Design by Faye Toogood

The detachable upholstery of the Puffy Lounge Chair is fat and plump, its generous shape spills freely over the sides of a tubular steel frame which, in stark contrast, is hard-lined and strong. The two key elements of this seating design by Faye Toogood are in purposeful and playful juxtaposition. The elementary frame is inspired by the rational structure of classic modernist design, whilst the extravagant quilt-like upholstery warmly embraces and envelopes, is comforting and reassuring. The Puffy Chair frame is available in powder-coated or sand-blasted steel finishes and a choice of thick canvas, chunky bouclé or luxurious leather upholstery.

The elementary frame is inspired by the rational structure of classic modernist design, whilst the extravagant quilt-like upholstery warmly embraces and envelopes, is comforting and reassuring. The Puffy Chair frame is available in powder-coated or sand-blasted steel finishes and a choice of thick canvas, chunky bouclé or luxurious leather upholstery.

Touchwood Bar Chair

Design by Lars Beller Fjetland

Subtle, strong, and elemental, the Touchwood Chair reflects designer Lars Beller Fjetland's belief that interacting with natural materials is of huge importance. Neither unnecessary decorations nor extraneous components should interrupt the simple relationship between material and user. The beechwood is molded into a continuous shape, making it contract grade durable, while preserving its flexibility. All variants of the Touchwood family stack, making them an ideal choice for public spaces or busy homes. If you perceive more than a little influence from classic minimalist Scandinavian design at play in this hardworking, functional chair, you'd be right! An armchair, counter stool, bar stool and bar chair in a variety of wooden and metal bases, heights and finishes complete the Touchwood Family.

Upholstery Sera by Rohi (Germany) 94% Virgin Wool, 6% Polyamide >122,000 Martindale Pilling 4-5 Lightfastness 5-8 Flame resistance EN 1021: Part 1 & 2, BS 5852: Part 1 & 2 (Crib 5), US Cal. Touchwood Chair

Design by Lars Beller Fjetland

Subtle, strong, and elemental, the Touchwood Chair reflects designer Lars Beller Fjetland's belief that interacting with natural materials is of huge importance. Neither unnecessary decorations nor extraneous components should interrupt the simple relationship between material and user. The beechwood is molded into a continuous shape, making it contract grade durable, while preserving its flexibility. All variants of the Touchwood family stack, making them an ideal choice for public spaces or busy homes. If you perceive more than a little influence from classic minimalistic Scandinavian design at play in this hardworking, functional chair, you'd be right! An armchair, counter stool, bar stool and bar chair in a variety of wooden and metal bases, heights and finishes complete the Touchwood Family.

Material

Beech
Fagus Sylvatica
Stained and Lacquered

Stackability

Touchwood Chair
1 – 6

128 cm / 50.4 in

The Touchwood chairs and armchairs are compatible with straight stacking chair trolleys that have a stacking plate/arm no wider than 40cm / 15 3/4". The stacking plate/arm should provide support under the chair's stacking bars, plus vertical support for the chairs to rest on when the stack is tilted back onto the trolley wheels during transport.

Udon Chair

Design by Staffan Holm

Udon is effortlessly charming—a seemingly simple chair. In reality, a huge amount of skill underlies this contemporary classic's form. Designer Staffan Holm took inspiration from archetypal bentwood chairs and borrowed traditional Japanese carpentry traditions, and used just a few simple joints to maintain a clean line and open structure. Colored wood stains accentuate a lively wood grain, and a generous seat promises a comfortable sit. The Udon Chair Upholstered features the highest-quality Scandinavian leather, adding yet another layer of comfort and elegance.

Sofas

Poufs

We are a little obsessive about the quality of our upholstered furniture. Our sofas and poufs are designed with ingenuity, built to last, and easy to assemble, plus they can grow and evolve with you. They are comfort personified.

Boa Pouf

Design by Sabine Marcelis

The donut-shaped Boa Pouf by Sabine Marcelis is perfectly sculptural; a bold graphic form that interrupts interior landscapes with its faultless chunky geometry. This piece of upholstered occasional furniture is rounded and soft, encased in a seamless outer layer that gives it an air-brushed finish: The smooth shape-knit textile that covers the Boa Pouf is a milestone in technologically innovative furniture making. Boa Pouf is as perfect for perching on, propping up feet, lounging against, as it is for making a sculptural statement and is the ideal expression of designer Sabine Marcelis, whose work is characterised by resonating clear, single, notes of absolute material, textile and colour.

Bon Pouf Round

Design by Hem

The Bon Pouf is ideal for perching upon or supporting tired feet; keep it on hand for any number of uses as an occasional seat, prop, or table. These versatile upholstered ottomans work equally well solo, as a single splash of color and softness, or in a gaggle. A mixed group of Bon Poufs in various sizes creates an interesting landscape of softness across any space. Select a shape that works for you, then choose your upholstery pattern and color (we often make smart reuse of textile offcuts here) to begin your collection.

Great Sofa - Product Details

Design by Philippe Malouin

The Great Sofa lives up to its monumental name. Great in scale; more landscape than furniture, an expansive archipelago of soft upholstery upon which to retreat. Great in looks; the sofa broadcasts its relaxez-vous informality with loose-fit covers that adapt to your body, crumple and cosset - nothing is uptight or rigid about Great Sofa. Great Sofa excels in concept too; easy-to-fit-and-remove covers aid effortless cleaning and offer longevity. No tools are needed for assembly. Plus, our modular system facilitates endless configurations for laidback, feet-up luxury. Corners, islands, conversation pits welcome.

Upholstery <i>Cifrado</i> by Kvadrat/Sahco (Denmark) 42% recycled polyester, 27% viscose, 24% recycled cotton, 7% linen 30,000 Martindale Pilling 5 Lightfastness 5-6 Flame resistance EN 1021: Part 1 & 2, US Cal. Koti 2-Seater Sofa

Design by Form Us With Love

Sheer, unadulterated comfort lies at the heart of the Koti Sofa. From the super-soft cushions that you sink into, to the downy armrests that are as comfortable as pillows, to the chunky bouclé or subtle virgin wool upholsteries, design studio Form Us With Love was obsessed with making it a relaxed sofa for relaxed living. Taking its name from the Finnish word for "home," the Koti Sofa was always intended to be a sanctuary.

Upholstery
Bute Storr
by Bute Fabrics (Scotland)
97 % Pure New Wool, 3% Nylon
65000 Martindale
Lightfastness 5
Flame resistance IMO FTP Code(2010) Annex 1, Part 8,
BS 5852: Part 1 & 2 (Crib 5), US Cal. TB 121

Sera
by Rohi (Germany)
94% Virgin Wool, 6% Polyamide
122,000 Martindale
Pilling 4-5; Lightfastness 5-8
Flame resistance EN 1021: Part 1 & 2, BS 5852: Part 1 & 2
(Crib 5), US Cal. TB 117-2013

Autumn
by Kvadrat (Denmark)
100% Recycled Polyester
50,000 Martindale
Pilling 4-5
Lightfastness 6-7

Kumo Sofa with Armrests

Design by Anderssen & Voll

The Kumo Sofa system is built around an innovative metal frame onto which individual cushion components are added. This intelligent design from Anderssen & Voll makes it especially convenient to live with—readily reconfigurable whenever and however you wish. The Kumo Sofa is also efficient and responsible to ship thanks to the same quality: it dismantles easily. Like its namesake—Kumo means “cloud” in Japanese—this sofa is light and soft as well as clever, with generous, foam-filled cushions covered in a luxurious, highly textured woolen fabric as a final flourish.

Upholstery Sera by Rohi (Germany) 94% Virgin Wool, 6% Polyamide >122,000 Martindale Pilling 4-5 Lightfastness 5-8 Flame resistance EN 1021: Part 1 & 2, BS 5852: Part 1 & 2 (Crib 5), US Cal. Kumo Corner Sofa with Armrest

Design by Anderssen & Voll

The Kumo Sofa system is built around an innovative metal frame onto which individual cushion components are added. This intelligent design from Anderssen & Voll makes it especially convenient to live with—readily reconfigurable whenever and however you wish. The Kumo Sofa is also efficient and responsible to ship thanks to the same quality: it dismantles easily. Like its namesake—Kumo means “cloud” in Japanese—this sofa is light and soft as well as clever, with generous, foam-filled cushions covered in a luxurious, highly textured woolen fabric as a final flourish.

Palma Pouf Small

Design by Kusheda Mensah

A Palma Pouf upgrades any space. Graphic, arresting, refreshingly carefree, these elegant upholstered seats bring visual interest and facilitate interaction wherever they are used. Casual and unorthodox seating encourages constructive and thoughtful communication, observes designer Kusheda Mensah. Her Palma Poufs series for Hem consists of three decorative shapes made from a solid base and a soft but sturdy upper. Use them as focal points, disrupt a traditional seating arrangement or playfully juxtapose shape and texture with a single pouf. Encourage perching, parking, lounging. Palma Poufs are available in a wide range of finishes for supreme mix or match options.

Palma Pouf Large

Design by Kusheda Mensah

A Palma Pouf upgrades any space. Graphic, arresting, refreshingly carefree, these elegant upholstered seats bring visual interest and facilitate interaction wherever they are used. Casual and unorthodox seating encourages constructive and thoughtful communication, observes designer Kusheda Mensah. Her Palma Poufs series for Hem consists of three decorative shapes made from a solid base and a soft but sturdy upper. Use them as focal points, disrupt a traditional seating arrangement or playfully juxtapose shape and texture with a single pouf. Encourage perching, parking, lounging. Palma Poufs are available in a wide range of finishes for supreme mix or match options.

Palo Block Single-seater Sofa

Design by Hem

Our signature Palo Sofa system is the gift that keeps on giving. It is even more flexible, functional and hardworking with the addition of Palo Block Sofa. The system consists of different sizes of back and side panels, easy-apply connectors and partitions, all working together to create fully modular, private seating spaces. This makes Palo Block Sofa the ideal solution for busy public areas, work environments, or even domestic spaces where a little respite is required. Endless configurations are possible; Palo Block's extreme versatility is its super strength.

Palo Block 3-seater Sofa

Design by Hem

Our signature Palo Sofa system is the gift that keeps on giving. It is even more flexible, functional and hardworking with the addition of Palo Block Sofa. The system consists of different sizes of back and side panels, easy-apply connectors and partitions, all working together to create fully modular, private seating spaces. This makes Palo Block Sofa the ideal solution for busy public areas, work environments, or even domestic spaces where a little respite is required. Endless configurations are possible; Palo Block's extreme versatility is its super strength.

Palo 2-Seater Sofa

Design by Hem

Palo is whatever you want it to be; a chaise, an ottoman, a sofa. This is furniture that evolves and grows with you. Elegant wood and metal legs are a hallmark of the architectural Palo family; as well as providing detail, they are the secret to a modular system that allows cushions and armrests to be moved and repositioned across the whole series. It doesn't end there... Want a side table for your tea? Or need to replace an individual element? Our approach enables you to update and grow your system, adapting to whatever life brings.

Puffy Sofa

Design by Faye Toogood

Voluminous, plush, instantly recognizable, the Puffy series by Faye Toogood has quickly become a coveted contemporary standard. This stylish seating offers maximum impact and extreme comfort. The Puffy Sofa is a variation on a theme, sharing all the same qualities as its Puffy siblings, but in a size big enough to share. Sink into the extravagant quilt-like upholstery alongside friends, and you can indulge in the reassuring comfort of the plump padding with loved ones. The Puffy family is made up of a generous upholstery cover supported on a rigid steel frame. Our Puffy Sofa is a 2.5 seater, meaning it is compact enough for small spaces, yet luxuriously roomy for a plus-one situation. The Puffy Sofa frame is available in powder-coated or sand-blasted steel finishes and a choice of thick canvas or luxurious leather upholstery.

Tables

Side Tables

A great table brings people together. It is something to gather around, to make decisions at, to create an interior statement with. We offer a whole range of these supporting stars, from maximal to minimal.

Alle Coffee Tables

Design by Staffan Holm

The solid-oak and walnut Alle Tables by Staffan Holm are a family of furniture that is especially Hem: traditional modes of making reclaimed for modern manufacture; good looks and practicality given equal consideration; engineering and handwork combined; quality materials used liberally. The circular Alle Coffee Table shares the same key features as the larger members of the family, in particular a softly rounded edge and a clever construction that requires no tools for assembly. Alle means "everyone" in German, and this table is a true reflection of the design principles we cherish. The Alle Coffee Table is available in three different finishes and three different sizes, use them together to create a compelling hard landscape.

Alle Conference Table Media

Design by Staffan Holm

Staffan Holm repurposed traditional carpentry techniques for the design of the solid-oak Alle Table, which features a structural beam on the underside recalling ancient Japanese temple architecture. In this and many other ways, the Alle Table is especially Hem: traditional modes of making reclaimed for modern manufacture; good looks and practicality given equal consideration; engineering and handwork combined; quality materials used liberally. Alle means “everyone” in German, and this table is a true reflection of the design principles we cherish. The Conference Media variation of the Alle Table comes with media ports and hidden compartments for neat storage and cable management, helping you work more efficiently.

Bookmatch Table

Design by Philippe Malouin

The Bookmatch Table by Philippe Malouin channels the natural beauty of freshly sawn timber. It celebrates craftsmanship, and yet is a design for modern manufacture and contemporary living. Featuring two perfectly mirrored wood veneer boards with edges engineered to give a waney (untrimmed) effect and a construction that locks with two wooden wedges, the Bookmatch Table is a perfectly considered homage to traditional carpentry skills. Visually hefty, although actually light, and seemingly raw and crafted, but in reality highly engineered, the Bookmatch Table is a sophisticated piece of furniture for design devotees.

Material <i>Oak Veneer</i> Quercus Robur Lacquered <i>Walnut Veneer</i> Juglans Nigra Lacquered Wood is a natural material. Chop Table Round

Design by Philippe Malouin

The Chop Table by Philippe Malouin is an evergreen design conceived for use in a range of public and private outdoor spaces. Intentionally simple, in both construction and aesthetics, the Chop collection reimagines classic archetypes to create pieces that are immediately recognizable, yet pleasingly unknown. The Chop table has a central rectangular column and a four-pronged base. It is heavily influenced by Malouin's work in the art world, where he often utilizes hand-led industrial techniques to develop elegant paired-back forms. The table is available with a square or round top, and is suitable for a range of different spaces and layouts. Chop is made from a durable stainless steel, and is available in a powder-coated colored finish.

Log Table

Design by Julien Renault

The Log Table is archetypal, its clean lines and refined silhouette contrived by designer Julien Renault, whose intention was to make a quintessential table for work or play. Its streamlined design cleverly conceals its engineering: a veneer-covered honeycomb core keeps the tabletop light, allowing it to span a great distance. Purposefully robust legs anchor the table and give it stability, and their simple screw connections make assembly straightforward. The ever-so-pleasing curved edge and rounded lines of the legs gently soften the overall effect.

Lolly Side Table

Design by Pauline Deltour

The Lolly Side Table is the perfect grab-and-go piece of furniture. Although diminutive in stature, the Lolly is big in versatility and character. Place it next to sofas as a prop for your cup of tea or book, beside beds and armchairs or as an impromptu laptop stand. Most of all make use of its mobile nature; Lolly can be wherever you need it to be. The table's leg is hollow, meaning you can hide messy lamp or charging cables within it and its foot is designed to slide beneath your sofa or chair so that Lolly hugs the side of your furniture, saving space and integrating effortlessly. Lolly is made from sheet steel and is available in a powder-coated finish as well as a unique ripple-effect textured finish for added interest and extra durability.

Max Table

Design by Max Lamb

There can be little doubt that the Max Table is furniture that will endure. Boasting extreme length and made from solid ash, this extraordinary and uncompromising design is closer to architecture than object. Designer Max Lamb was given the brief to make a table so strong and so generous, it could be stood upon. He delivered a design that is monolithic, bold, and consequential. Huge in scale, elementary in form, brilliant in construction, the Max Table (and its partner, the Max Bench) will be your home's centerpiece—the hub around which you and yours gather for generations to come

Max Bench

Design by Max Lamb

Just like the Max Table, to which this seat is a partner, the Max Bench is a formidable piece of furniture: huge in scale, elementary in form, brilliant in construction, and made from solid ash. Use the bench as it was intended—alongside the Max Table for a fierce dining set—or be unconventional and use it as a monumental stand-alone piece on which to sit, store books, or display favorite possessions. The Max furniture family embodies its name in every way. Created by one of contemporary design's finest talents, Max Lamb.

Worm Coffee Table

Design by Soft Baroque

Effortless additions to any interior, the Worm family of occasional tables is a certified crowd pleaser. Soft Baroque has created three solid wood tabletops for this playful series, their real-life shapes inspired by digital drawing tools. Worm Tables can feel classic or fresh depending on their context, with solid wood legs taking the design in a refined and tactile direction. Use Worm alone as a hero side table or en masse for a landscape of expressive surface space. This light-on-its-feet table brings an accent of easy charm to any room. Worm tabletops are available in three shapes and two wood finishes: natural beech and brown stain, and are paired with solid wood legs.

Material Solid Beech <i>Acrylic lacquer</i> Country of origin Poland Tests & certifications EN 15372:2016 – L2: General use - Furniture – Strength, durability and safety – Requirements for non-domestic tables, FSC 100%	 Beech <i>Natural Lacquered</i>  Brown <i>Brown Stained</i>

Lighting

How to light your home or workspace is one of the most consequential interior decisions. We've created systems that allow our customers to take the lead and create their own lighting designs and compositions.

Alphabeta Floor Lamp

Design by Luca Nichetto

Variety and flexibility are at the heart of the modular Alphabeta lighting system by Luca Nichetto. Eight different shade shapes in eight powder-coated colors equate to a plethora of possibilities—1024 to be exact. Whatever your aesthetic, from strict and somber all-black to playful and flamboyant color combinations, sharp lines or voluptuous forms, Alphabeta can accommodate them all. Alphabeta are bidirectional—meaning they emit light from both the top and the bottom of the shade—so that you need not choose between spotlight and ambient light but can enjoy both. The Alphabeta Floor Lamp consists of our modular shade on top of a slender, gently angled metal stand. The stand is weighted for stability and adjustable for ultimate accurate control. Every turned-steel shade and milled part is made in Italy.

Alphabeta Pendant Light

Design by Luca Nichetto

Variety and flexibility are at the heart of the modular Alphabeta lighting system by Luca Nichetto. Eight different shade shapes in a wide range of powder-coated colors equate to a plethora of possibilities—1024 to be exact. Whatever your aesthetic, from strict and somber all-black to playful and flamboyant color combinations, sharp lines or voluptuous forms, Alphabeta can accommodate them all. Alphabeta are bidirectional—meaning they emit light from both the top and the bottom of the shade—so that you need not choose between spotlight and ambient light but can enjoy both. The Alphabeta Pendant Lights hang on a metal wire, with a sinuous cable adding a curvaceous detail. Pendants can be used singularly or in groups for an impactful installation. Every turned-steel shade and milled part is made in Italy.

Alphabeta Wall Light

Design by Luca Nichetto

Variety and flexibility are at the heart of the modular Alphabeta lighting system by Luca Nichetto. Eight different shade shapes in a wide range of powder-coated colors equate to a plethora of possibilities—1024 to be exact. Whatever your aesthetic, from strict and somber all-black to playful and flamboyant color combinations, sharp lines or voluptuous forms, Alphabeta can accommodate them all. Alphabeta are bidirectional—meaning they emit light from both the top and the bottom of the shade—so that you need not choose between spotlight and ambient light but can enjoy both. The Alphabeta Wall Light comes either with a cable and dimmer, or without cable for direct installation.

Knuckle Table Lamp

Design by David Taylor

The Knuckle Lights by David Taylor are an exercise in visual balance, a kind of joyful play between the organic and the geometric. Knuckle is inspired by Taylor's signature bent extruded aluminum art pieces, which are created by forcing this most stringent of materials into new shapes and forms. This method of working, translated into Knuckle, creates a sense of softness and fluidity uncommon in an industrial product. Knuckle comes in the form of a modest table light with one bulb, and as a chandelier version, resplendent with eight bulbs.

Toto Table Lamp

Design by Fabien Cappello

Toto is an irrepressible burst of color and light. Its silhouette is that of an archetypal lamp, all-angled shade and a chunky base. But that is where the familiarity ends. Toto is entirely covered from textile as a playful extension of the classic lampshade itself. Material uniformity, coupled with vivid color and graphic pattern, lends the lamp a cartoonish presence. So does exaggerated scale; the Toto Large lamp is blown up, jumbo, never-to-be-ignored, visually giant yet physically light, while Toto Small's tidy and diminutive size is more than a bit charming. With Toto, Fabien Cappello has designed a joyful, covetable depiction of a lamp. Customers can choose their own combination for shade and base in both Toto Large and Medium variants. Toto Small is available in block colors only.

Shelving

Storage

Where would we be without some order in our lives? Our elegant and considered storage systems are designed to work with your belongings, whether it is display or concealment you are looking for.

Hide Pedestal

Design by Karoline Fesser

The Hide Table by Karoline Fesser is a Hem hero product. Why? Because this modest piece of furniture is far more necessary and boundless than it might at first seem. The Hide Table can be discreet: tucked under a larger desk or table for additional storage, or sitting quietly in the corner of a room, its back turned to conceal its contents. Or it can be bold: a pedestal and side table for your favorite objects, a punctuation of brilliant color, or an open display for all manner of paraphernalia. The Hide Table is beautifully finished in powder-coated steel and has wheels for easy maneuverability. We have yet to hear from a regretful owner.

Zig Zag Shelf

Design by Studio deFORM

There is a pleasing visual rhythm to the Zig Zag Shelf: its grid-like frame effortlessly creates an elegant semblance of order, making whatever you choose to place on it feel instantly arranged and considered. Designers Studio deFORM invented a system of construction that enables you, the end user, to assemble the Zig Zag Shelf without tools. An innovative hidden folding hinge allows the flat-packed shelves to simply stretch into shape like an accordion—ready for use in record time.

Rugs

What goes underfoot should be of the very best quality. All our rugs are handmade and designed for longevity, using highquality natural fibers.

Monster Rug

Design by Siri Carlén

The Monster patterns by artist and illustrator Siri Carlén are playful exaggerations of markings found in nature. And fittingly, these boldly striped and ringed patterns adorn our largest rugs yet. The Monster collection of floor coverings are made to the highest standards; they are painstakingly hand-knotted by skilled makers in soft new wool, meaning that your Monster will be around to offer deep comfort and vibrant colour for many years to come. Produced in India by a weaving collective to global ethical standards such as GoodWeave, SGS, and Woolmark.

Design by Pauline Deltour

This image shows a blank, aged, light brown page, likely an endpaper or flyleaf of a book. The paper has a textured, slightly mottled appearance with visible creases and some minor discoloration or foxing, characteristic of old paper. There is no text or other markings on the page.

180

Solid Rug

Design by Hem

Solid Rug rug isn't just a floor covering; it's a sensory experience, offering plush comfort underfoot. Meticulously crafted, its durability ensures a lasting symbol of refined taste. With a generous pile height and with muted, elegant colors, it seamlessly integrates into any sophisticated interior. Elevate your space with the timeless elegance and versatility of the Solid Rug, where traditional craftsmanship meets contemporary appeal.

Knotted in India from 100% New Zealand Wool, the rug meets global ethical standards such as GoodWeave and Woolmark.

Throws

Cushions

All of our throws and cushions are made from the best quality textiles, whether traditional woven wools or radical 3D-printed fabrics. They soften the edges and bring punctuations of color, pattern, and texture to every interior.

Crepe Cushion

Design by Hem

Our cushion collection is a series of versatile cushions to be used wherever and whenever a little soft support is needed in your home, office, or public space. In high quality textiles like chunky bouclé, luxurious textured wool and sumptuous soft velvet, they come in a large variety of colors and two sizes. Apply them liberally to add colorful punctuation, softness and comfort to any interior.

Neo Cushion

Design by Hem

The Neo Cushion collection is a series of versatile cushions to be used wherever and whenever a little soft support is needed in your home, office, or public space. This textile, called Uniform Melange, has an impossibly smooth appearance and thick, cushiony texture. The Neo Cushion is named after neoprene, a familiar and functional textile with which it shares some similarities, namely a softness to touch and durability. Two tones of thread are used in the 3D knitting, creating an unusual effect that is especially pleasing up close. The Neo Cushions are available in three different colorways and two sizes. Apply them liberally for maximum impact and extreme comfort.

Bronto Espresso Cup (Set of 4)

Design by Supergroup

Stocky, bulky and bold, Bronto tableware is a pleasing handful of ceramics. An ample mug and chunky espresso cup are immediately recognizable by their uncommonly fat handles. A side plate and bowl's rounded edges and nonchalant shapes follows suit. Even the smallest of the Bronto family, an eggcup, has serious chunk. As with all Supergroup designs, breezy forms belie technical expertise and, in fact, the exaggerated soft outlines of the Bronto range are a feat of ceramic production. A joyful color palette of high gloss glazes, plus a natural clay option, completes the Supergroup signature. Bronto is intended as your go to set for casual breakfasts, and zippy coffee breaks. 'Small but mighty' might be a fitting description of the Bronto Espresso Cups. These diminutive vessels pack a punch because of their elemental forms and bold color.

Bronto Mug (Set of 2)

Design by Supergroup

Stocky, bulky and bold, Bronto tableware is a pleasing handful of ceramics. An ample mug and chunky espresso cup are immediately recognizable by their uncommonly fat handles. A side plate and bowl's rounded edges and nonchalant shapes follows suit. Even the smallest of the Bronto family, an eggcup, has serious chunk. As with all Supergroup designs, breezy forms belie technical expertise and, in fact, the exaggerated soft outlines of the Bronto range are a feat of ceramic production. A joyful color palette of high gloss glazes, plus a natural clay option, completes the Supergroup signature. Bronto is intended as your go to set for casual breakfasts, and zippy coffee breaks. The Bronto Mug has a distinctive profile, thanks to its pleasingly fat handle. Bronto Mug's cheery shape disguises a seriously engineered product that pushes the boundaries of industrial ceramic production.

Fars Glas Drinking Glass (Set of 2)

Design by Erik Höglund

Fars Glas, which translates to “father's glass” in Swedish, is a collaborative effort by Kosta Boda and Hem, reinvigorating an iconic archival design. Originally conceived in 1969 by the famous Swedish glassblower and designer Erik Höglund, this glass captivates with its abundant proportions, seamless simplicity, and unwavering durability. Crafted through mouth-blown techniques using lead-free glass, Fars Glas emerges as an enduring, indestructible design that embodies a harmonious blend of tradition and modernity, suitable for any occasion. Its robust nature ensures that this glass will withstand the test of time, for gatherings of generations to come.

Molino Grinder

Design by Fabien Cappello

Think of the Molino Grinder as a functional sculpture for your tabletop. This super-sized utensil is efficient at granulating salt, pepper and spices, and its blown-up form is a graphic monument for your dinner table, too. Molino is a characteristically exuberant design from Fabien Cappello whose work reflects the energy and vivacity of Mexico, where he lives and works. The hand-painted, striped Molino grinders are made from turned solid beech wood and finished with high-gloss lacquer, while the solid beech Molino grinders are finished with a sheen lacquer to bring out the beauty of their natural properties.

Care

Instructions

General care and cleaning instructions

General cleaning

Using a solution of water mixed with a mild, environmentally friendly general detergent or washing up liquid, clean the surface with a soft, damp cloth. Always dry the surface after cleaning using a dry cloth. If the surface has a grain, always rub in the direction of the grain. If there is no directional grain, use a light, circular motion. Never use powdered abrasives or cleaning solutions that contain abrasives, or scotch pads / scouring pads as this may damage the surface.

Natural surfaces, timber, laminates and veneer

High pressure laminates / melamine surfaces

General cleaning

Using a solution of water mixed with a mild, environmentally friendly general detergent or washing up liquid, clean the surface with a soft, damp cloth. Always dry the surface after cleaning using a dry cloth. If the surface has a grain, always rub in the direction of the grain. If there is no directional grain, use a light, circular motion. Never use powdered abrasives or cleaning solutions that contain abrasives, or scotch pads / scouring pads as this may damage the surface.

Wood veneers & laminated wood

General care & cleaning

Using a solution of water mixed with a mild, environmentally friendly general detergent or washing up liquid, clean the surface with a soft, damp cloth. Wipe up any spills immediately to avoid stains. Take care not to soak the surface, and ensure the surface is well dried after cleaning before use. Placing objects on a wet surface can leave marks or rings. Never use powdered abrasives or cleaning solutions that contain abrasives, scotch pads/scouring pads or sandpaper as this may damage the surface. A veneered wood surface should be treated as any other wooden table. Always use a coaster under drinks to protect the surface, and never place any hot objects directly on the surface. Always leave an air gap if placed next to a radiator or heat source.

Light Exposure

For the first few weeks, objects should not be left on the table for too long as it may cause discoloration due to light exposure. After a few weeks the surface will settle. In general, uneven exposure to light should be avoided where possible, to ensure an even ageing of the wood material.

Solid wood—lacquered finish

General care & cleaning

Using a solution of water mixed with a mild, environmentally friendly general detergent or washing up liquid, clean the surface with a soft, damp cloth. Wipe up any spills immediately to avoid stains. Take care not to soak the surface, and ensure the surface is well dried after cleaning before use. Placing objects on a wet surface can leave marks or rings. Do not use abrasive pads or sandpaper on the wooden surface. Always use a coaster under drinks to protect the surface, and never place any hot objects directly on the surface. Always leave an air gap if placed next to a radiator or heat source.

Light Exposure

For the first few weeks, objects should not be left on the table for too long as it may cause discoloration due to light exposure. After a few weeks the surface will settle. In general, uneven exposure to light should be avoided where possible, to ensure an even ageing of the wood material. In case of significant damage to the surface finish, solid wood can be sanded down and re-lacquered. *This should only be undertaken by a professional.*

Solid wood—oiled or waxed finish

General care & cleaning

Using a solution of water mixed with a mild, environmentally friendly general detergent or washing up liquid, clean the surface with a soft, damp cloth. Wipe up any spills immediately to avoid stains. Take care not to soak the surface, and ensure the surface is well dried after cleaning before use. *Placing objects on a wet surface can leave marks or rings.* Do not use abrasive pads or sandpaper on the wooden surface. Always use a coaster under drinks to protect the surface, and never place any hot objects directly on the surface. Always leave an air gap if placed next to a radiator or heat source.

Light Exposure

For the first few weeks, objects should not be left on the table for too long as it may cause discoloration due to light exposure. After a few weeks the surface will settle. In general, uneven exposure to light should be avoided where possible, to ensure an even ageing of the wood material.

Re-application of Oil or Wax

Protective oil or wax should be re-applied as needed to maintain the woods' resistance to stains and spillages. Always use a high-quality, colorless, furniture-grade wood oil/wax, designed for the specific wood species of the product (Oak, Ash etc.). Availability of surface treatment products vary by region, so check with your local hardware store for advice on the best product to use. Clean the surface first as per the above instructions. Always apply any treatment in the direction of the grain, and wipe off any excess with a clean, dry cloth. Follow the instructions on the oil / wax product packaging for specific guidance on the application. If in doubt, consult a professional to refinish solid wood furniture. Hem will not be responsible for any issues that arise from refinishing of our products.

Metals

General cleaning

Always test a small area prior to cleaning. Wipe with a clean and dry or slightly damp cloth wrung out in a mild solution of environmental friendly detergent. Always dry with a clean and dry cloth after removing any residue. Keep the surface clean and dry. It may be stained permanently if any residue is not removed relatively quickly. Do not use any abrasive or chemical cleaning products, if not advised otherwise, as it can damage the surface.

Anodized aluminum

Always test a small area prior to cleaning. Wipe with a clean and dry or slightly damp cloth wrung out in a mild solution of environmental friendly detergent. Always dry with a clean and dry cloth after removing any residue. Keep the surface clean

and dry. It may be stained permanently if any residue is not removed relatively quickly. Do not use any abrasive or chemical cleaning products or solvents, if not advised otherwise, as it can damage the surface. Always dry with a clean and dry cloth after to remove any residue.

Chrome or polished metal

Always test a small area prior to cleaning. Wipe with a clean and dry or slightly damp cloth wrung out in a mild solution of environmental friendly detergent. Always dry with a clean and dry cloth after removing any residue. Keep the surface clean and dry. It may be stained permanently if any residue is not removed relatively quickly. Do not use any abrasive or chemical cleaning products, if not advised otherwise, as it can damage the surface. For everyday cleaning, wipe with a clean and dry or slightly damp cloth wrung in a glass cleaner. Always dry with a clean and dry cloth after to remove any residue.

Copper / brass

Always test a small area prior to cleaning. Wipe with a clean and dry or slightly damp cloth wrung out in a mild solution of environmental friendly detergent. Always dry with a clean and dry cloth after removing any residue. Keep the surface clean and dry. It may be stained permanently if any residue is not removed relatively quickly. Do not use any abrasive or chemical cleaning products, if not advised otherwise, as it can damage the surface. The copper and brass is untreated and will develop an elegant patina over time as it's handled or put in contact with liquids. Though the finish is intentionally left untreated they can be returned to their original polished state using a dedicated brass or copper polishing set.

Powder coated steel

Always test a small area prior to cleaning. Wipe with a clean and dry or slightly damp cloth wrung out in a mild solution of environmental friendly detergent. Always dry with a clean and dry cloth after removing any residue. Keep the surface clean and dry. It may be stained permanently if any residue is not removed relatively quickly. Do not use any abrasive or chemical cleaning products, if not advised otherwise, as it can damage the surface.

Stainless steel

Always test a small area prior to cleaning. Wipe with a clean and dry or slightly damp cloth wrung out in a mild solution of environmental friendly detergent. Always dry with a clean and dry cloth after removing any residue. Keep the surface clean and dry. It may be stained permanently if any residue is not removed relatively quickly. Do not use any abrasive or chemical cleaning products, if not advised otherwise, as it can damage the surface. Grease stains can be carefully removed using a cloth dabbed in glass cleaner. Always dry with a clean and dry cloth after to remove any residue.

Other materials

Cover fabrics & upholstery

Each fabric requires its own care and maintenance, please refer to the specific fabric for more details. Dust and dirt wear textiles down over time, so regular cleaning and maintenance is the best way to ensure the longest possible lifetime of your product. Vacuum the product frequently on a low to medium setting, preferably with an upholstery nozzle, and be careful not to rub the material with force as this potentially could damage the textile. Remove stains by patting the area gently

with a cloth wrung in lukewarm to hot water (preferably distilled), start from the outer rim of the spill and work toward the centre. If the stain is persistent we recommend using an environmentally friendly mild detergent, and then again patting the area down. To avoid any unforeseen damages, please try the detergent on a less visible area of the product. Finish off the stain removal by firstly repeating the process with clean water, to absorb any residue detergents, then take a dry cloth to dry up any remaining water. Please note these are only recommendations and we can never guarantee complete stain removal. We always recommend contacting a professional cleaning company for additional advice regarding your stain Upholstered furniture may be affected by exposure to direct sunlight or heat, consequently we recommend to avoid placing the products next to windows, radiators or fireplaces.

Glass

Glass should be wiped with a dry cloth. Clean the surface with a glass cleaner as needed. Never use abrasives or sharp objects to clean the glass.

Leather

Dust and dirt wear the leather down over time, so regular cleaning and maintenance is the best way to ensure the longest possible lifetime of your product. As the leather is semi-aniline, it will mark and patinate over time as it comes into contact with the natural oils from skin, and moisture. Vacuum the product with a soft brush frequently on a low to medium setting and be careful not to rub the material with force as this potentially could damage the leather. Alternatively use a dry cloth to remove any dust or dirt. If liquids are spilled on the leather, we recommend acting quickly and dabbing up as much as possible with a dry cloth or paper. Take care not to rub the surface, since this may spread the mark or push dirt into the pores of the leather. Leather furniture may be affected by exposure to direct sunlight or heat, consequently we recommend to avoid placing the products next to windows, radiators or fireplaces.

Plastics

Plastics should be wiped with a dry cloth. Dirt can usually be removed with a cloth and lukewarm water. If the stain persists, a mild detergent can be used to clean the surface. Always wipe off the surface with clean cloth and water, and then dry off any residue water. Don't use any abrasive tools, abrasive cleaning agents, strong chemicals or sharp objects as this may damage the surface. Colored plastic exposed to direct sunlight will over time start to fade due to the ultraviolet radiation. For this reason we recommend avoiding direct sunlight when possible.

Rugs

Dust and dirt wear the rugs down over time, so regular cleaning and maintenance is the best way to ensure the longest possible lifetime of your product. Shedding of loose fibers will occur with all new rugs. Use scissors to trim (do not pull) loose yarn to avoid unravelling. Vacuum the rug frequently on a low setting, never use hard roller brushes and be careful not to rub the material with force as this potentially could damage the rug. Clean stains directly as the spill occurs, dabbing the area with clean water. If the stain is persistent we recommend using an environmentally friendly mild detergent, and then again patting the area down. To avoid any unforeseen damages, please try the detergent on a not too visible area of the product. Finish off the stain removal by firstly repeating the process with clean water, to absorb any residue detergents, then take a dry cloth to dry up any remaining water. Please note these are only recommendations. We can never guarantee complete stain removal. We always recommend contacting a professional rug cleaning company for additional advice regarding your stain, and from time to time to have it dry-cleaned. Avoid direct and continuous

exposure to sunlight and rotate the rug periodically to promote even wear. A rug pad is recommended to extend the life of your rug further.

Stone materials

Clean your stone objects with a dry cloth. Dirt can usually be removed with a cloth and lukewarm water. If the stain persists, a mild detergent can be used to clean the surface. Always wipe off the surface with clean cloth and water, and then dry off any residue water. Don't use any abrasive tools, abrasive cleaning agents, strong chemicals or sharp objects as this may damage the surface. Stone is a porous material and liquids, such as coffee, tea and wine, or products with strong color agents, such as lipstick, can cause stains. To avoid this, make sure to wipe off any spills or stains directly with a damp cloth. To a small extent stone, like with all natural materials, may have natural marks on the surface which are indications of genuine stone.

Sustainability

Commitment

Making designs of obsessive quality includes a thoughtful approach to sustainability. At Hem, we work hard to reduce our environmental impact in every aspect of our work, recognising how our decision-making, on both the large and the small issues, has consequences. As a European design brand serving a global customer, we adhere to both local and international protocols, alongside which we have set out our own key objectives, which we explain on the following pages.

Enduring and Durable

It has always been Hem's guiding principle to design and make furniture that endures. You will often hear us repeat the motto; "designing and making pieces for the auction houses of tomorrow". In the simplest of terms; we want our objects to last, to transcend fashions, to remain desirable for generations, and in doing so they will remain in use and outside of the waste stream.

We achieve durability through a rigorous and lengthy design process and by consistently and stubbornly choosing high quality materials and manufacturing. It is not too much to say that we have a very exacting design and research process of which we are very proud. This translates to an extremely low "reject rate" during our manufacturing processes and an extremely low "claim rate" with our customers, meaning there is little waste generated during making and our objects rarely break or are returned. We also achieve longevity by designing systems of furniture that can grow with their owner, rather than be replaced. Did you know that we keep spare parts for our key designs in stock for years? Meaning that your Hem products can often be repaired and their usable life extended.

Most of our collection is certified to EU and American contract requirements and durability protocols, the highest standards for furniture manufacturing. You can access a full list of all the certifications we adhere to here:

Circularity

Although we hope all of our objects remain in use for generations, they will inevitably find themselves back in the circular economy at some point, so we address the end life of an object at the beginning of the design process. Currently, we use recyclable materials whenever possible and are working towards introducing more sustainable alternatives into our material palette. We have long refrained from using virgin plastics unless necessary in our designs and we use single materials where we can, meaning objects can be easily broken down for recycling.

Material Transparency

A thorough understanding of the materials we use is a key part of the Hem design process. You might have noticed that many of our products are singular in their materiality, thereby celebrating and revealing that material in the most direct way we can. We gather together all data about our materials and their sourcing for our customers to review; each Hem product is issued with an Ecology Sheet. See an example here:

We ensure all our materials are ethically grown, harvested, sourced, or made. We only use low-emitting materials and make sure that each is compliant with international standards. The majority of our wooden objects are made with FSC or PEFC timber and we can provide alternative documentation in the instances where they are not. Lastly, our dedication to responsible material usage is across the board; all of Hem's packaging is made from 100% recycled cardboard and we increasingly find utility in the material offcuts produced during our manufacturing, reducing waste wherever we can.

Manufacturing

Making furniture requires a lot of energy. We seek to minimize the energy we use wherever we can. We do this in a number of ways: Firstly, by partnering with responsible factories and makers – the majority of our collection is produced in Europe and as such our products strictly adhere to EU environmental standards and industry certifications, these are some of the most robust in the world. And when our products are made outside of the EU, we are just as stringent about good practice and efficient energy use. We even consider energy use whilst designing our products; minimizing the amount of processes needed and always choosing energy efficient methods of making.

Delivery & Supply Chain

Hem serves an international customer, with most of our sales being made online. Therefore, our delivery and supply chain are a pivotal part of our business. We endeavor to control and reduce the distance our products travel from multiple warehouses on different continents and insist our trucks and containers are always at least 90% full before they travel. We also limit unnecessary freight between production facilities by building this into our designs from the beginning, always producing a product at a single factory or workshop if we can. Doing so substantially reduces the hidden carbon footprint of the production process.
