WELCOME TO THE WORLD OF INTERSTUHL

– Your partner for holistic office design and customised room solutions. For us, people take centre stage. We are convinced that the right space and suitable seating have the potential to transform working environments. Our collections not only offer maximum comfort, but also the freedom to design your workplace exactly as you want it – whether through a wide range of material and colour options or tailor-made solutions.

We accompany you on your journey towards innovative working concepts that promote communication and collaboration, and also support you in selecting the right products and seating to optimally tailor your spaces to your requirements.

With our expertise in interior design, planning and digital services such as Intensor and Goconut, we create working environments that are both functional and inspiring. Sustainability is not a trend, but a core requirement: We rely on environmentally conscious materials and resource-saving processes to design sustainable offices.

Interstuhl redesigns working environments – flexibly, individually and always with a focus on the people who work in them. Let's work together to create spaces that inspire, motivate and connect – to transform offices into workspaces that unlock potential.

For further information,
visit interstuhl-group.com

INDIVIDUAL SELECTION

THE COMPLETE RANGE
FOR INDIVIDUAL REQUIREMENTS

One of the aspects that makes Interstuhl so special is the flexibility and variety of its portfolio. Therefore, we of course continue to offer an extensive array of models, designs, materials and colours. With the **Individual Selection**, our partners and customers have a wide range to choose from within each collection to suit their requirements – just as they always have done.

The Individual Selection is available to
download from the Interstuhl Partnernet
in PDF format: interstuhl.com/partnernet

INTERSTUHL SPRINT

ORDER TODAY.
READY FOR DISPATCH TOMORROW.

On your chairs, get set, go! Welcome to the INTERSTUHL SPRINT express range. You will now find our SPRINT DAILY models at the end of the price list on page 368. You can quickly and easily order our attractive models without any time-consuming configuration. The products are available directly from the factory and are ready for dispatch just one day after the order is received (plus dispatch time). Discover our diverse range of products for better sitting and benefit from tried-and-tested models with the best price-performance ratio and a 10-year guarantee.

For further information, visit
interstuhl.com/sprint

WE DESIGN SPACES IN WHICH PEOPLE CAN GROW

WORKSPACE SOLUTIONS FROM INTERSTUHL – A COMPREHENSIVE PLANNING, SERVICE AND PRODUCT OFFERING

We develop agile room concepts, covering every step – from situation analysis, goal definition and planning, all the way through to implementation in your space. Our aim is to create places and working conditions that enable better, more productive interaction.

We design inspiring working environments that cover entire buildings or individual rooms and are perfect for the most varied forms of work, be it independent, focused work or collaborative activities and creative processes.

You can find more information
about our Interstuhl room
solutions on our web page or in
our brochure "New rooms for
new ways of working"

01

PLANNING NEEDS UNDERSTANDING

Together, we analyse your current situation and develop a project goal or project vision: What does New Work mean for your company? What requirements and needs are there? And how can we design your working environment to meet them?

02

PLANNING AND DESIGN

Using the insights from phase 1, we design a tailor-made room concept, taking all conditions and space requirements into consideration, and incorporating your employees' needs.

INDIVIDUAL WORKSPACE SOLUTIONS PRODUCED STEP BY STEP

03

EXECUTION AND SUPPORT

We implement your customised room concept from start to finish, covering every job: Project management, implementation planning and installation work. Then we introduce your employees to the new space.

**“ I’M NOW
COMING TO THE
OFFICE TWICE
AS MUCH AS
BEFORE. SIMPLY
BECAUSE IT
FEELS NICE TO
WORK HERE. ”**

OUTSTANDING IN EVERY RESPECT

Through our products, we make an important contribution to the health and well-being of people in offices. Technical perfection, uncompromising quality, design you can experience with all your senses and the careful handling of all resources are what characterise every Interstuhl product. People are our reference point for everything we do. Our aim is still to offer the best possible solution to our customers' requirements.

We firmly believe that products can only truly be good if they are produced well. At the beginning of the 1990s, the first binding guidelines were put into place, which continue to be expanded on to this day. In doing so, we commit ourselves to maintaining strict compliance with statutory requirements. Our many awards are testament to this.

SUSTAINABILITY

Today, an unspoilt, clean environment and low energy consumption constitute the most elementary expression of quality of life and an intelligent philosophy for business and for life. This realisation forms the basis of our work and the foundation of our actions. This also includes treating the earth's ecosystem, its resources and natural cycles in a manner that is both respectful and justifiable in the long term. Interstuhl has long since recognised the importance of this topic and is always working to further embed sustainable principles within the company. Environmental awareness is an essential part of our corporate philosophy. We take care to ensure that all products and production methods are environmentally friendly.

COMPANY CERTIFICATES:

PRODUCT CERTIFICATES:

QUALITY AND DURABILITY

Long-lasting quality is also an important factor in terms of the ecological and economic environmental impact. Products that last longer reduce the consumption of new raw materials. This conserves natural resources and reduces the environmental harm caused by depleting resources and manufacturing new materials. Products need to be replaced less frequently, which means less waste and more cost savings for our customers. That's why all our products come with an extra-long guarantee of ten years.

Visit our sustainability page for more detailed information on this topic.

DESIGN

Aesthetics means more to us than just outstanding design. Our aim is to develop design that you can experience with all your senses – a comprehensive, innovative and technically appealing experience. This goes just as much for every last detail of our products, as it does for the furnishing of entire rooms. We are proud that many of our products have even won awards for their design.

INTERSTUHL PLANNING DATA

EVEN MORE CONVENIENCE THANKS TO OFML AIDED PLANNING! CONFIGURE DIRECTLY ON THE PRODUCT!

All commercial and graphical data from the Individual Selection is available in pCon.update. Thanks to OFML aided planning, it is now even more convenient and intuitive to use our planning aids. With immediate effect, it is now possible to make modifications directly on the 2D/3D model, even on complex products such as HUB configurations.

CASTORS

The rule of thumb here is:
Hard floors - soft castors;
soft floors - hard castors.
For safety reasons, the EN applies to office swivel chairs;
it states that unoccupied swivel chairs may not roll away.

The rolling behaviour is heavily influenced by the composition of the floor. It is therefore necessary to coordinate the castors with the type of floor. In proper use, our castors deliver the necessary roll resistance as specified by DIN EN 1335.
Make the right choice!

INSTRUCTIONS FOR USE: CASTORS / FLOORS

PARQUET FLOORS

Should not be walked on with wet or dirty outdoor shoes. Dust, stones, grains of sand, etc. can cause serious damage, particularly if these are pressed into the floor through loads, e.g. from shoes, castors of swivel chairs (some of these particles may be pressed into soft castors).

STONE FLOORS

Spilling drinks (cola, alcohol, etc.) and treating these floors with acidic cleaning agents leads to an etching and disintegration of the lime shares contained in the stone. This in turn leads to damage following additional pressure loads from castors.

LINOLEUM

Contains linseed oil, i.e. a fatty acid, as a raw material component. If basic cleaning is carried out with an alkaline cleaner (pH value > 10.5) the fatty acids together with the alkalines can cause a so-called saponification process. This produces soap that withdraws the main constituent of linoleum – the fatty acid – particularly in areas where the floor is subject to heavy loads (heavy through traffic, castors of swivel chairs, etc.) Strong discolorations, heavy wear, cracks and breaks may occur.

We cannot be held liable for any claims for compensation resulting from this type of use.

CARE INSTRUCTIONS FOR THE COVER FABRICS AND TABLE TOPS

To ensure that you enjoy your Interstuhl product as long as possible, please note the following care instructions:

Fabric

Regular cleaning maintenance: Please clean the upholstery at least once a month by using a vacuum cleaner with nozzle at low vacuuming power (500 watt) or brush in the direction of the fabric by using a soft brush. We would recommend using a professional cleaning company for linen or silk due to their delicate nature.

Stain Removal

Stains are best removed by using a fabric cleaner e.g. PURATEX or an intense cleaner from LCK. Please test the colour fastness on a hidden section of the upholstery first. Hereafter, please follow the cleaning product instructions. Please do not apply the cleaning product directly onto the upholstery, use a soft cloth. Please clean stains as soon as possible and always from the outside to the inside. In order to avoid any residual marks, please clean the entire area after this. Dab off moist stains with an absorbent cloth. We would like to ask you not to apply a lot of pressure when cleaning. The rubbing might change the surface of the upholstery.

For help with stubborn stains or marks, please visit our website (www.interstuhl.com/care) or contact our customer service team directly.

Leather

Leather is a natural product; it is unique similarly to the fingerprint of a person. Each leather hide has its individual character which is stretched for furniture. In contrast to fabric, leather is not as stretchy as fabric when used permanently or frequently. Therefore, the tension decreases and typically, wrinkles occur. Colour variations may also occur because the leather absorbs the colour differently. Our employees do their

very best to avoid colour variations. Please refer to "Manufacturing and Quality Regulations" for further information.

General Remarks

Please do not use any cleaning products containing solvent, shoe polishing or beeswax. Do not leave leather close to the heating. Please use special leather cleaning products only, e.g. KERALUX. KERALUX products from LCK were developed by tanneries and upholstery companies and therefore, fulfil high-quality furniture leather requirements. Please see www.interstuhl.com/care.

Maintenance

It is recommended to wipe the leather once a week in order to remove dust from pores. Every half year, please clean the leather thoroughly. Please use a product similar to KERLUX leather cleaning product set A or cleaning product set P (for Semi-Aniline leather or coated leather). Firstly, the leather is cleaned thoroughly, thereafter;moisturiser is applied to prevent the leather drying out.

Stain Removals

Leather stains can be removed with KERALUX intense cleaner. For special stain remover e.g. suitable for ballpoint-pen stains, please refer to www.interstuhl.com/care.

Synthetic leather

Apart from its appearance, synthetic leather does not have any characteristics in common with real leather. For this reason, it needs to be taken care of differently. Unlike real leather, which needs care and cleaning, synthetic leather needs cleaning only. This is due to its surface

coating (PVC, PC) which does not require any care substances.

Regular Maintenance

Please use a moist cloth in order to dust off the synthetic leather.

Cleaning

In order to remove stains, please use special synthetic leather cleaner from LCK. Please test at a hidden section first.

Protection

For light synthetic leather it is recommended especially to use an intensive protector from LCK. These products help to prevent the build-up of dirt in areas of abrasion caused by jeans for example.

Veneer

Maintenance:
Please dust the veneer regularly using a dry, soft and lint-free cloth. Depending on the wood, please use special wood care products like SILVAPUR care set by LCK for varnished or oiled/waxed woods.

Laminates

Maintenance:
Please dust the veneer using a dry, soft and lint-free cloth. Please use standard laminate cleaning products for stain removal.

Our customer service team is happy to answer any questions you may have with regard to furniture care. Alternatively, you can visit the furniture care page on our website at www.interstuhl.com/care.

GENERAL TERMS OF BUSINESS

1. General information

1.1 Our terms and conditions of payment and sale apply to all goods and services. Other conditions, e.g. customer terms of purchase, will only then become components of the contract if this is expressly agreed in writing. If the customer is a merchant or a legal entity under public law or a special fund under public law, our terms and conditions of payment and sale apply to all future transactions.

2. Contents of the contract

2.1 All information in catalogues, price lists or order proposals is non-binding. Only the terms agreed for a specific order are binding. Terms for an order are only considered binding once we have accepted the order from the customer (order confirmation). Suggestions we have made regarding an order only become binding after the order has been placed and confirmed.

2.2 Custom-made products are items that are not mass-produced or are not included in the price lists. This also applies to colour schemes.

2.3 The formation of a contract is subject to correct self-delivery. This does not apply if we are responsible for the missing or incorrect delivery, particularly if we have not carried out a congruent hedging transaction. We shall inform the customer immediately of any unavailable items and will refund any payments made without delay.

3. Prices

3.1 We shall quote our prices to merchants, legal entities under public law and public law special funds as gross prices minus discounts, plus the applicable statutory value-added tax, excluding packaging, transport costs, assembly and insurance. If there are more than four months between the formation of the contract and the delivery date, we are entitled to charge the price valid upon delivery.

3.2 For entrepreneurs and in the case of successive delivery contracts, we charge the current price valid on the day of delivery.

4. Transfer of risk

4.1 Our deliveries are carried out via FCA, Tieringen – INCOTERMS 2020, insofar as no other arrangement has been agreed upon.

4.2 If shipment is delayed as a result of circumstances for which the customer is responsible, the risk is transferred to the customer from the day on which the delivery is ready to be shipped. In this case, we are entitled to store goods at the customer's expense and risk at our discretion and to request payment of the agreed price.

4.3 Customer claims as a result of a defect in the delivery must be based on immediate examination of the goods and notification of the defect after delivery – within seven working days at the latest – in the case of a recognisable defect. In the case of an invisible defect, notification must take place within this same period after the defect is discovered.

5. Delivery

5.1 If a date or time period is stated in or can be determined from the contractual documents for deliveries, e.g. a specific calendar week, this is when the delivery is due. The customer must ensure that the delivery can be received at least during normal business hours. For lead times or deadlines that must not be exceeded under any circumstances (fixed deadlines), this must be expressly agreed in a way that cannot be misconstrued.

5.2 If, due to force majeure, operational disruptions, strikes, lockouts, war, disasters and/or official interventions or orders, we are prevented from making the delivery and/or providing the service, we are entitled either to withdraw from the contract or to provide the agreed service as soon as possible after these obstacles are removed. There will be no compensation for damages in these cases. We reserve the right to not make a delivery where the credit rating is insufficient or not provided.

5.3 The customer shall be responsible for bringing the goods to the place of use and for

unpacking and setting them up. However, if the goods are to be conveyed by us to the customer, we are entitled to request payment for the work involved in providing this additional service.

5.4 Call orders are limited to a maximum of one year; during this time all deliveries must be accepted; the minimum recall period is one month.

6. Payments

6.1 Unless otherwise agreed, payments are due immediately and must be paid 30 days after the invoice date at the latest, without any deductions. Payment terms do not postpone the due date, but rather the latest possible payment date according to the calendar. If the payment is received within 10 days of the invoice date, we shall apply a 2% discount.

6.2 Bills of exchange and cheques will only be accepted if agreed upon, and only as conditional payment. If a cheque or bill of exchange is lost, we are not obliged to continue seeking payment from the document. Discount and bill of exchange charges and other costs are to be paid by our customer and must be settled in advance. Cheques will not be accepted as cash payment.

6.3 We have legal claims in the event of late payment.

6.4 The customer will only be entitled to offset if their counterclaim has been legally established or is undisputed. This ban on offsetting does not apply to counterclaims due to a defect based on the same contractual relationship as our claim. The customer is only entitled to exercise a right of retention insofar as their counterclaim is based on the same contractual relationship.

7. Retention of title

7.1 We retain the title to the goods until full payment has been received for all claims, including future claims, arising from the entire business relationship, including all ancillary claims. If there is an open account, the retained title acts as security for balance claims.

7.2 The customer is permitted to resell goods

owned or co-owned by us in the ordinary course of business. The customer hereby assigns to us all claims against their customers arising from the resale; we hereby receive this assignment.

7.3 The customer remains authorised to collect claims assigned to us. The customer must immediately inform us of any third-party access to our retained-ownership goods or to a claim assigned to us, particularly any attachments. The costs of any required interventions are payable by the customer. 7.4 We undertake to release goods to which the title has been retained, as well as assigned claims in accordance with Section 7.2, if the realisable value of the collateral exceeds 110% of the secured claim. This release shall be carried out via transfer of ownership or reassignment.

8. Material defects

8.1 If the goods delivered are defective, we will choose whether to remedy the defects or send a replacement.

8.2 Defects do not include technologically justified differences in dimensions or shape, laminate colour, material colour, or the colour and texture of the real wood veneer.

8.3 The customer undertakes to allow us access to the goods about which a complaint is being raised.

8.4 If deliveries are to be based on drawings or other information provided by the customer, we shall follow these instructions if they are technically feasible. We will not check whether they are feasible until a special order is placed.

8.5 The customer assumes liability that their commissioned order does not infringe upon the rights of any third parties. The customer's statutory rights of recourse against us only exist insofar as the customer has not entered into any agreements with their own customer which go beyond the statutory claims for defects.

9. Other claims, liability

9.1 Insofar as this is not contradicted below, there may be no other, ongoing claims by the

customer against us. This particularly applies to claims to compensation due to breach of contractual duties and tort. We are therefore not liable for damages not incurred to the delivered goods themselves. Most notably, we are not liable for loss of profits or other damage to the customer's assets.

9.2 The above limitations of liability do not apply in the event of malicious intent, gross negligence on the part of our legal representatives or senior employees or culpable breach of material contractual obligations. In the event of culpable breach of material contractual obligations, we are only liable for typical, reasonably foreseeable damage, except in the case of malicious intent or gross negligence by our legal representatives or senior employees.

9.3 These limitations of liability also do not apply in the event that liability is assumed under the Product Liability Act for personal injury or material damage to objects for private use in the event of defects in the delivered goods. It shall also not apply in the event of loss of life, physical injury or damage to health and in the event that a guaranteed quality is lacking.

9.4 Insofar as we have no or limited liability, this also applies for the personal liability of our employees, workers, colleagues, legal representatives and subcontractors.

9.5 This does not affect the statutory regulations regarding burden of proof.

10. Limitation period on claims for defects and damages

10.1 The limitation period for customer claims due to defective goods is one year. This does not apply if a longer period is provided for in accordance with Section 438(1) No. 2 (buildings, objects used in buildings), Section 479(1) (recourse claims) or Section 634(1) No. 2 (construction defects) of the German Civil Code. This also does not apply to claims to compensation which are based on compensation for bodily injury or damage to health, or on malicious intent or gross negligence on our part

or on the part of our subcontractors.

10.2 The limitation period for customer compensation claims which do not relate to defective goods is one year. This does not affect the limitation period of claims due to malicious intent or gross negligence as well as bodily injury or damage to health and due to the Product Liability Act.

11. Documents and samples

11.1 We reserve all intellectual property rights and copyrights for cost proposals, drawings, images, sketches and other documents and samples; the documents must be sent back to us upon request and must not be passed on to third parties, even as a copy.

11.2 Samples must be returned to us or purchased within a month unless otherwise agreed. Samples for custom-made products must be purchased by the customer and may not be exchanged.

12. Place of jurisdiction, applicable law

12.1 It is hereby agreed that German law will apply.

12.2 For all legal disputes, including in the context of processes for bills of exchange or cheques, our head office is the place of jurisdiction if the customer is a merchant, a legal entity under public law or a special fund under public law. We are also entitled to sue at the customer's place of business.

13. Data protection

13.1. The personal and company-related data of our customers is stored and processed in compliance with the EU Data Protection Regulation (EU-DSGVO).

TERMS OF SALE AND DELIVERY

This price list is valid from 19th January 2026. The publication of this list renders all previous price lists invalid. The delivery will be carried out in accordance with our General Terms and Conditions, about which you have been informed. Models from previous ranges and past price lists that are no longer listed are only available on request. The stated prices are non-binding recommended prices in € plus the applicable VAT.

Terms and conditions of supply

Our deliveries are carried out via FCA, Tübingen – INCOTERMS 2020, insofar as no other arrangement has been agreed upon.

Changes to orders

Changes to orders and postponement of delivery dates can only be taken into consideration if they are confirmed by us in writing. We reserve the right to add a surcharge in these cases. If we have to store products due to the postponement of a delivery, we will charge €3.00 per product and calendar week. Changes can only be made up to 5 working days after placing the order. No changes can be made to daily or weekly orders.

General information

Measurements

The measurements are determined according to EN 1335. The stated measurements are approximate values. Tolerances are permitted.

Colour differences

Colour deviations in upholstery fabrics or décors are due to production or, in the case of leather and wood, to natural causes. No claims may be made for slight deviations, particularly in the event of subsequent deliveries.

Orders

Minimum order information: Always state the basic model and the number of the cover. If the seat and backrest are to have different covers, please specify the seat first and then the backrest. Example: 152G/5800 – 5824. Options: If you want a different option than the standard one (the standard option is indicated by black dots), please state the corresponding order

number after the minimum order details. Options example: 172H/ER01 – 8010/601/703. Please use our order forms.

Castors and glides

All chairs/armchairs are fitted with castors for carpeted floors as standard (in accordance with DIN EN 12529). If the chairs are to be used on hard floors, please select the option "soft castors" or "felt glides for hard floors" when ordering the chairs. We cannot be held liable for the use of incorrect castors or glides.

Custom-made products

Interstuhl can only provide its exceptionally reasonable price-performance ratio by using rational production. Please clarify any special requests with us. We will add a surcharge here depending on the design required. The cover materials provided will be invoiced in price group 2 with a minimum order quantity of 10 items per model and order. When using customer fabrics

or customer leather, the usability of the cover materials must be checked using the provided sample before the order can be accepted. We cannot be held liable for the quality of the material delivered to us, nor for its processing or for any defects that subsequently occur. We generally assume a minimum width of 1.40 m for cover fabrics provided. It is essential that you provide us with processing instructions (particularly the direction of the upholstery as well as the front and back). We will gladly send you a form to fill in to this end. The order shall only be entered and confirmed after the cover materials have been checked for usability.

Return and disposal

Interstuhl will be happy to assist, upon request, in disposing of products in an environmentally friendly manner. Any transport costs that may arise as a result of this are payable by the customer.

Interstuhl Büro Möbel GmbH & Co. KG ("INTERSTUHL") offers a warranty for the guaranteed products defined here, subject to the following conditions.

The warranty applies in addition to and without prejudice to any legal or contractual elements and rights that the claimant has.

Guaranteed products are all products by INTERSTUHL with the exception of electronic/digital products such as sensors. The warranty applies to guaranteed products used in the country in which this price list is valid. The only person entitled to make claims on this warranty is the owner of the guaranteed product. Other persons do not have the right to make claims on this warranty. The warranty covers situations in which a guaranteed product suffers from a defect within the warranty period and a warranty exclusion does not apply. INTERSTUHL offers a long-term warranty of ten years (of which the first three years comprise a full warranty) from the date of production 1st February 2016, which can be found on a label on the underside of the product. During the full warranty period, all spare parts will be supplied free of charge including assumption of packaging costs. INTERSTUHL reserves the right to carry out repairs during the full warranty period, at the factory or on-site, or via and at the premises of authorised dealers and partners. Any costs incurred for unjustified warranty repairs will be invoiced. After expiry of the full warranty period, INTERSTUHL supplies all spare parts free of charge from the fourth to the tenth year as part of the long-term warranty. Costs for the duration of warranty work carried out at the dealer, the end customer or in the plant shall be invoiced, including the costs for transit times. These will be offered on request and in-

voiced separately. Wearing parts such as cover materials, foam parts (integral foams), upholstery, castors, surfaces of frames/bases and tables, edges and edge strips of tables are excluded from the long-term warranty.

Claims cannot be made on the warranty if The defect has been caused by the guaranteed product being installed, put into operation or transported incorrectly by or on behalf of the claimant; the guaranteed product being modified incorrectly (e.g. attempts at repair) by the claimant or by third parties that have not been authorised by INTERSTUHL; failure to observe safety regulations, operating instructions and installation standards; force majeure (storms, lightning strike, overvoltage, fire, etc.); The defect has been caused by use of a cleaning agent or care product not recommended by INTERSTUHL.

Only cleaning agents and care products recommended by INTERSTUHL may be used for maintaining and cleaning your item of Interstuhl furniture. (www.interstuhl.com/care) The defect has been caused by normal wear and tear, natural deterioration or environmental factors; The defect has been caused by the claimant requesting a deliberate variation on the standard product or by any materials made available by the claimant. The warranty periods apply for conventional industrial use, i.e. eight hours per day, 220 working days per year. In cases of multiple-shift operation, or use 24-hours per day throughout the year, the warranty period shall be reduced accordingly. If a warranty claim is made, INTERSTUHL shall remedy the defect – at its own discretion and at its own expense – by having the guaranteed product repaired by INTERSTUHL, a retailer or the claimant, or by supplying new or reconditioned parts. Spare parts shall be the property of INTERSTUHL. If an inspection by INTERSTUHL reveals that a warranty claim cannot be made,

WARRANTY TERMS

and that the claimant could have known this, INTERSTUHL may charge a service fee for inspection and handling in accordance with its currently valid price list. The warranty period shall not be restarted or limited by acceptance of a warranty claim.

To make a claim on the warranty, INTERSTUHL requires the following information: Description of the defect, model name, model number, order confirmation number, delivery note or invoice document (if applicable). This information about the chair and table models can be found on the label on the underside of every product. If this information is not provided, INTERSTUHL may refuse to process the warranty claim. The warranty claim can be processed more quickly and easily if INTERSTUHL is sent a photograph and/or a short video together with the information stated above. A claim can be made on the warranty by sending this information to:

Interstuhl Büro Möbel GmbH & Co. KG
Brühlstraße 21,
72469 Meßstetten-Tieringen, Germany
Fax +49 (0) 7436 871 88709
E-mail: info@interstuhl.de

The guaranteed product must be sent to INTERSTUHL in its original packaging or packaging of equal quality. This warranty is subject to German law. If the purchaser is a merchant as defined in the German Commercial Code, a legal entity under public law or a special fund under public law, the registered office of INTERSTUHL in Meßstetten-Tieringen shall be the exclusive place of jurisdiction – including on an international level – for all disputes arising from the warranty, either directly or indirectly.

As of: 05/2019

WORKMANSHIP AND QUALITY STANDARDS

for all types of leather

These characteristics do not indicate any deterioration in quality; they prove the authenticity of the leather and demonstrate the genuine sturdiness of the natural raw material.

The colour and veneer samples shown provide a true representation of the series colours and structures. Wood is a natural product. Veneers with different structures and colours are always used for the production of tables. As a result

complaints about colour and structure deviations caused by the material can not be accepted.

The variations and colours of the models you will find in the pricing table

of each product family. The Table also shows the relevant ordering reference number.

INTERSTUHL **SPRINT-DAILY** ORDER TODAY. READY FOR DISPATCH TOMORROW.

You can quickly and easily order our attractive DAILY model without any time-consuming configuration. The products are available directly from the factory and are ready for dispatch just one day after the order is received (plus dispatch time). Please note that our DAILY models are delivered disassembled in a box. The Models 139RS and 179RS are also available „assembled in protective cover“ against surcharge. The maximum order quantity is limited to 30 chairs per customer per week.
