

MAKE YOURSELF AT HOME

MyKartell

PRICE LIST 2026

WE IMAGINE HOMES TO LIVE IN, SPACES TO ENJOY, BUILDINGS TO FURNISH AND TO PERSONALISE. OUR ENVIRONMENTS FORM THE ESSENCE OF IDENTITY, WHERE DETAILS BRING IDEAS TOGETHER.

A CATALOGUE OF NEW DESIGNS THAT SIT ALONGSIDE THE BRAND'S SIGNATURE PIECES, WITH FINISHES THAT REFRESH A TIMELESS STYLE AND MATERIALS THAT, THANKS TO TECHNOLOGY, PERFORM BETTER THAN EVER. CONCEPTUAL WORLDS AND THE PRODUCTS THAT INHABIT THEM, SHAPED BY THE CREATIVITY OF OUR DESIGNERS, EACH WITH THEIR OWN STORY. TOGETHER, THESE STORIES BUILD A CATALOGUE OF POSSIBILITIES WHICH, COMBINED AND HARMONISED, CREATE THE KARTELL IDENTITY.

Kartell
2026

MyKartell

MAKE YOURSELF AT HOME

Some visions are fixed on images; others look beyond, exploring in depth and expanding horizons. Our vision is one of broad perspectives and horizons that are distant not only geographically but in design too. We look beyond what we have already done and adopt a mindset that is open to all new products and new forms of partnership. Our approach is expansive not only in our stores but in our way of doing business; we interact with all segments of the market, traditional, digital and contract.

We imagine homes to live in, spaces to enjoy, buildings to furnish and to personalise. Our environments form the essence of identity, where details bring ideas together.

Our experience stands in our favour; it enables us to draw on the past to plan a new future, inspired by the fundamentals of our character, our creativity and sense of style, our dedication to quality and our propensity for innovation. Our experience also provides us with a way to perceive and to develop our project of design. It allows us to explore the infinite potential of combining products, colours, materials and dimensions to create something unique, personal and purposeful.

We have never stopped, but continue to add new ideas to our already vast catalogue, with finishes that update the timeless style of our products, and materials that use the latest technology to improve performance and to guarantee maximum quality. For Kartell, the word 'experience' means using the past as a launch pad into the future.

Our affinities encourage us to dialogue continuously with privileged interlocutors, partners and customers, and to develop our brand together. We consider needs before seeking solutions; we listen to questions before providing prompt, targeted answers. The close affinity between us and our designers helps us to experiment, dialogue and interact, with the reciprocal understanding needed to generate smart ideas and beauty.

Every design has a story to tell, and a collection of stories produces a catalogue of variables. Blended and harmonised, these identify a highly personal style – the style that embodies the value of the Kartell brand.

There is the potential of a recognised, loved and universally appreciated brand too – the potential of a product with a clear identity and the ability to transverse eras and styles. This potential is a positive force that transforms the role of our products and interprets it in daily life. It is the potential of a colour and finish to give a product a new identity. It is the potential of communication to follow the new digital revolution and to dialogue with the world using constantly renewed language and tools.

Our flexibility stems from our propensity to change, to dare, to modify in response to new developments. Our aims are multiple: to improve access to design, the sustainability of production processes, the quality of products and processes, responsibility to certifications, the timeliness of responses, the empathy between people and their living spaces, and personal relationships with architects.

Our catalogue, along with its product data sheets, is arranged in 10 chapters:

Chairs

Sofas and armchairs

Tables

Lighting

Furnishing complements

Tableware

Books

Fabrics

Stoneware

Wood

Each chapter includes product data sheets containing photos, characteristics, colour variants, materials, dimensions and prices.

This rational arrangement makes our data sheets easy to consult and facilitates information searches. The information provided is detailed and complete. At the end, readers can find product certifications, technical notes and a summary of materials.

HOW TO READ THE DATA SHEETS

NAME 0000
Designer

GENERAL INFORMATION

The pages are organised vertically for each family of products, simply scroll down to read the technical information for each one. Specifically, you will find the following information for each product:

A PRICES

The prices shown in the following price list apply from 1st February 2026, subject to Kartell's right to revise the same following prior notification. All prices are shown in the reference country currency. For each individual item, the price including VAT will be shown, with the price excluding VAT indicated below. VAT is calculated in compliance with the law in force when the price list is printed. Prices are always per unit. Exceptions to this rule are countries in which dual pricing has not been specifically set out, and therefore only the net price is indicated.

B CODE

This is the number which accompanies each product or individual component, and must be indicated on every order. It is located next to the technical drawing or finish.

C DIMENSIONS

The maximum dimensions are indicated in order to provide all of the necessary elements to assess the space occupied by the product. Depending on the country of reference, the units of measurement are cm or inches.

D WEIGHT

The net weight of the product is stated, as this is a useful piece of information for products such as tables and chairs, to evaluate the suitability of the product for a specific use (e.g. for use in public spaces). Depending on the country of reference, the units of measurement are kg or pounds.

E DESCRIPTION AND MATERIALS

This section contains details of the materials and any essential technical and functional aspects.

F COLOUR SAMPLES

Details of the colours or colour combinations available. The full-colour guide symbol identifies the colours available to be freely combined, the two-way guide symbol identifies the fixed seat/colour pairing that cannot be changed. The colours shown are as close as possible to the actual product shade. However they are to be considered as general indications for consultation.

G SYMBOLS

INDICATES THAT THE CHAIR IN QUESTION IS STACKABLE AND SPECIFIES THE MAXIMUM NUMBER OF UNITS ALLOWED

INDICATES THAT THE PRODUCT IS SUITABLE FOR OUTDOOR USE

INDICATES THAT THE PRODUCT IS CUSTOMISABLE

PRODUCT IS DISHWASHER SAFE

PRODUCT IS SUITABLE FOR FOOD CONTACT

PRODUCT IS NOT SUITABLE FOR MICROWAVE USE

PRODUCT IS SUITABLE FOR INDOOR USE

PRODUCT IS NOT SUITABLE FOR CHILDREN AGED UNDER 18 MONTHS

PRODUCT IS NOT SUITABLE FOR CHILDREN AGED UNDER 3 YEARS

PRODUCT WITH REMOVABLE COVER

MADE FROM RECYCLED MATERIAL

BIOPOLYMER MADE FROM RENEWABLE RAW MATERIALS, DERIVED FROM NON-GMO AGRICULTURAL WASTE

MADE FROM FSC™ CERTIFIED WOOD

MADE FROM 2.0 POLYCARBONATE FROM RENEWABLE RAW MATERIAL

MADE WITH THE RECOVERY OF WASTE PLASTIC MATERIALS FROM ILLYCAFFE IPERESPRESSO CAPSULES

MADE FROM RECYCLED PMMA

100% RECYCLABLE PRODUCT

MADE FROM RECYCLED FABRIC

SYMBOLS AND SPECIFICATIONS ASSOCIATED WITH INDIVIDUAL LIGHTS

INSULATION CLASSES

CL. I

CL. I INDICATES THE LEVEL OF PROTECTION AGAINST ELECTRIC SHOCK. IN THE CASE OF CLASS I, INSULATION IS "SIMPLE" AND THE APPLIANCE'S EARTHING DEVICES ARE REQUIRED.

INDICATES THE LEVEL OF PROTECTION AGAINST ELECTRIC SHOCK. IN THE CASE OF CLASS II, INSULATION IS "REINFORCED" AND THE APPLIANCE'S EARTHING DEVICES ARE NOT REQUIRED.

INDICATES A DEVICE IN WHICH THE PROTECTION AGAINST ELECTRIC SHOCK IS BASED ON THE EXTRA LOW VOLTAGE SAFETY POWER SUPPLY AND IN WHICH NO HIGHER VOLTAGES ARE PRODUCED.

DIRECT MOUNTING

INDICATES THE TYPE OF SURFACE ON WHICH THE APPLIANCE CAN BE MOUNTED. THE SYMBOL "F" INDICATES THAT THE APPLIANCE CAN BE MOUNTED DIRECTLY ON NORMALLY INFLAMMABLE SURFACES.

PROTECTION RATING

IP20

INDICATES THE DEGREE OF PROTECTION AGAINST THE PENETRATION OF DUST, SOLID BODIES AND MOISTURE. IP20 RATING REFERS TO ORDINARY APPLIANCES THAT HAVE NO SPECIFIC REQUIREMENTS.

VOLTAGE

INDICATES THE APPLIANCE POWER SUPPLY VOLTAGE.

ATTACHMENT

INDICATES THE LAMP HOLDER ATTACHMENT TYPE ON THE APPLIANCE.

MAX POWER

INDICATES THE MAXIMUM POWER OF THE BULB THAT CAN BE CONNECTED TO THE APPLIANCE WITHOUT COMPROMISING ITS SAFETY.

ENERGY CLASS

COLOUR TEMPERATURE +CRI

THE COLOUR RENDERING INDEX IS THE NUMERICAL VALUE THAT INDICATES THE ABILITY OF A LIGHT SOURCE TO REPLICATE THE COLOUR TONES AND THE COLOURS OF THE OBJECTS ILLUMINATED.

AVERAGE LIFE OF LIGHT SOURCE

LUMEN

LUMINOUS FLUX OF THE LIGHT SOURCE

DIMMABLE VERSION

BATTERY LIFE

TYPE OF BULB

H CERTIFICATIONS

Reliability test information. More information is available in the "CERTIFICATIONS: Reference legislation" section

I INFORMATION REGARDING PACKAGING UNITS

At the bottom of the page, you will see the following information indicated for each package in the order: the number of pieces, weight, volume and dimensions in cm or inches, depending on the reference country. The pieces within a package cannot be purchased separately.

N.B. The company reserves the right to make changes to the technical characteristics of the products in the catalogue, without notice. Any new product or variation to the technical characteristics of the products will be made known to the public via the most effective methods. How to read and use the Price List

To create this exclusive finish, Kartell has developed a special new "Graphic impression" technique that uses a high-tech printing process to produce graphic patterns directly on the chair body. This version comes in 4 floral and geometric patterns and in 9 colour variants. An original and ultramodern way to experience Liberty® prints.

SEAT

Recycled ABS and recycled soft polyurethane, coated with genuine leather tanned in natural processes using olive oil waste

AVOTAN® A new, ecological, sustainable and circular tanning process. Italy is one of the world's largest producers of leather goods and the world's second largest producer of olive oil. Olive oil production generates oil vegetation water as a waste product. This waste product, however, contains substances that are highly valuable for the tanning industry: phenols and polyphenolic compounds with an effective antimicrobial and phytotoxic action, antioxidants and tanning agents. In this way, two food industry waste products can be used to create a valuable, long-lasting, ecologically sustainable and circular product. Unlike other vegetable tanning solutions, this Avotan uses no natural resources, does not contribute to deforestation, and uses existing waste that would otherwise have to be disposed of.

Woven technopolymer

The Belvedere Tech chair upholstery uses a technical fabric. Its composite structure ensures exceptional durability, dimensional stability, and resistance to external agents, while maintaining shape, color, and performance over time. Designed to offer comfort, long-lasting use, and easy maintenance, the fabric ensures ideal outdoor performance, combining tactile quality with technical reliability in perfect harmony with the contemporary aesthetics of Belvedere Tech. The range features high-performance fabrics: high strength, the ability to withstand challenging climatic conditions (UV rays, mold, weathering), and excellent durability. These products do not contain intentionally added PFAS (they were neither formulated nor designed to contain PFAS affecting a specific function or characteristic of the product).

MATERIAL
post-industrial recycled thermoplastic technopolymer obtained from Illy coffee
pods

A new major partnership with the Illy Group supplements the unwavering research conducted by Kartell to develop innovative materials and promote sustainable production. For the first time ever, post industrial waste coffee pods are being used to regenerate material, which is ground into a granule-like consistency to give rise to the second raw material, giving the material a new lease on life so it can be injected into a Kartell mould to produce a designer product. The partnership with Illy does not stop with the mere supply of recycled material, but it embraces a new way of managing the circular economy process between two excellences. The quality of a consumer industrial product leads to an industrial project which generates beauty and is in itself based on quality. It took almost two years of work to achieve the quality standard and the necessary mechanics to produce a chair from waste coffee pods. The symbol of this project is a chair, whose name brings to mind the subject of experimentation on recycled material. Re-Chair is the latest creation by Antonio Citterio for Kartell made from recycled material and now the special ambassador of project powered Illy caffè

FRAME post-industrial recycled thermoplastic technopolymer obtained from illy coffee pods

SEAT Missoni fabric-upholstered polyurethane

A new major partnership with the Illy Group supplements the unwavering research conducted by Kartell to develop innovative materials and promote sustainable production. For the first time ever, post industrial waste coffee pods are being used to regenerate material, which is ground into a granule-like consistency to give rise to the second raw material, giving the material a new lease on life so it can be injected into a Kartell mould to produce a designer product. The partnership with Illy does not stop with the mere supply of recycled material, but it embraces a new way of managing the circular economy process between two excellences. The quality of a consumer industrial product leads to an industrial project which generates beauty and is in itself based on quality. It took almost two years of work to achieve the quality standard and the necessary mechanics to produce a chair from waste coffee pods.

Polyurethane coated with genuine leather tanned in natural processes using olive oil waste

Full-grain leather
BC Leather NN Black

AVOTAN® A new, ecological, sustainable and circular tanning process. Italy is one of the world's largest producers of leather goods and the world's second largest producer of olive oil. Olive oil production generates oil vegetation water as a waste product. This waste product, however, contains substances that are highly valuable for the tanning industry: phenols and polyphenolic compounds with an effective antimicrobial and phytotoxic action, antioxidants and tanning agents. In this way, two food industry waste products can be used to create a valuable, long-lasting, ecologically sustainable and circular product. Unlike other vegetable tanning solutions, this Avotan uses no natural resources, does not contribute to deforestation, and uses existing waste that would otherwise have to be disposed of.

MATERIAL

post-industrial recycled thermoplastic technopolymer obtained from Iilly coffee pods

In the ongoing process of research that Kartell is developing in terms of materials and sustainable production innovation, an important new partnership has been entered into with the illy group. A second raw material is created from post-industrial waste pods via a process of regeneration of the material, which is ground and returned to granule form, gaining a new life. It can then be injected into the Kartell mould and used to generate a design product. The collaboration with illy does goes beyond the mere supply of recycled material to embody a new way of managing the circular economy between two excellences. The quality of a mass consumer industrial product gives origin to an industrial project that generates beauty and is itself based on quality. It took almost two years of work to achieve the required quality standard and mechanics to create a product from waste coffee pods.

Kleo is the new rug, designed by Ludovica+Roberto Palomba, also suitable for outdoor use, available in three shapes, round, square and rectangular, and in three colours. The rugs adapt perfectly to every living space and, thanks to their resistance to footfall, are particularly well suited to use outdoors, in the garden, on the terrace and by the swimming pool. Kleo is hand-made on a loom, with no backing. Easy to wash, breathable and waterproof, they allow water to drain off, making them suitable for use in humid environments. The rug can be matched with a cachepot in the same material, available in two sizes.

A NEW ECO FRIENDLY RECYCLED MATERIAL
Kartell is using recycled PMMA in its transparent productions for the first time. Teatime is the first product made from this material, which originates largely from the depolymerisation of plastic waste from various sources. This material retains aesthetic quality and structural requirements comparable to pure new material; this project makes it possible to give industrial plastic waste a new lease of life and turn it into new products that will stand the test of time and become design icons.

Kartell - The Culture of Plastics

“Kartell - The Culture of Plastics” is the first monograph on the Kartell design brand. Published by Taschen and available in six languages in two volumes (the first includes Italian, Spanish and Portuguese and the second includes English, French and German), the monograph is a chronological excursus through the technological, aesthetic and functional innovations and the activities of the Italian company, world leader in the industrial manufacture of design products made of plastic materials now in its third generation.

Narrating the tale in this coffee table book divided into decades from the '50s through to the new millennium are Silvana Annicchiarico, Gillo Dorfles, Chantal Hamaide, Marie-Laure Jousset, R. Craig Miller, Giovanni Odoni, Franca Sozzani and Deyan Sudjic while journalists Giulia Crivelli and Giovanni Odoni interview the current president, Claudio Luti, who in 1988 took over the management of the company from his father-in-law, Giulio Castelli.

A design industry of global fame synonymous with the concept of "transparency" in 400

pages full of images describes its earliest stages, its evolution, the challenges successfully met, its incessant drive in research and technological innovation, its designers, the prizes won and its worldwide distribution.

But Kartell expresses itself best through its product icons that can be found in homes all over the world. There are historic shots and pictures from the archives, announcements and visuals, with detailed captions on technological innovations revealing the history of a company that has taught us to appreciate the culture of plastics.

Kartell - The Culture of Plastics
Taschen Books, 400 pages
Size: 250x315 mm
Editors: Hans Werner Holzwarth and Elisa Storace

Code for IT ES POR: 95100/03
Code for ENG FR DE: 95100/04
List price:
49,99 € - 44,99 £ - 69,99 \$

For purchasing conditions contact your area representative directly.

kARTEll - 150 items, 150 artworks

kARTEll - 150 items, 150 artworks. Not only a book photographs taken by the most relevant photographers and contemporary artists world-wide, such as Mario Testino, Peter Lindbergh, Helmut Newton, Steven Meisel, David LaChapelle. With absolute freedom, every artist chose a Kartell product, within the items from the historical until the current collection, in order to give birth to his personal interpretation. In addition to images, a rich collection of stories written by famous people within different fields (cinema, music, art, show business).

A gift idea for design connoisseurs as well as for fashion, visual arts and photography lovers.

kARTEll - 150 items, 150 artworks

Skira, 280 pages
Size: 210x297 mm
Concept: Franca Sozzani
Art direction: Luca Stoppini

Italian book code: 95000/03
Public price: 60,00 €

For commercial conditions please contact your agent.

Simple care is needed for the maintenance of Kartell products to retain the original features of the materials.

PLASTIC MATERIALS

Cleaning. Use a soft damp cloth with soap or a liquid detergent, preferably diluted with water.

The use of the following substances must absolutely be avoided: acetone, trichloroethylene, ethyl alcohol or detergents containing even small quantities of these substances which cause irreparable damage to the plastic of which the products are made.

We recommend always using a damp cloth to prevent plastic surfaces from becoming charged with static electricity which attracts dust. Also avoid abrasive solvents, cleaning powders and creams, steel wool or rough sponge cloths.

Use. Do not drag objects across the plastic surface, even if it has a scratch resistant finish, since sharp objects can damage the plastic just as they would damage wood or metal. Do not place very hot plates or pots directly on the surface, but always use a cloth or trivet.

WOOD

Cleaning. As with plastic surfaces, use a soft damp cloth. Do not use alcohol or other spot-removers. For a deeper cleaning use a little non-abrasive liquid detergent and wipe in the direction of the wood grain. Dry the surface well with a soft cloth. Never use acetone, trichloroethylene or ammonia.

Use. Moisture in wood can cause swelling which is normal in a natural material. Our woods hold up well under normal temperature and humidity conditions. Slight color variations from one piece of wood to another are normal and these tend to disappear with time. Wood can change color over time. To delay this, it is best to avoid placing it in direct sunlight.

METALS

Cleaning. Normal dirt on either painted or plain metallic steel or aluminium surfaces must be removed with soap and water (preferably hot) and neutral liquid detergent; dry with a soft cloth or with a chamois cloth. Never use cleaning powders, abrasive or steel wool pads, which can cause scratching, or liquid detergents that contain chlorine or its derivatives such as bleach or muriatic acid.

Use. Avoid spilling grapefruit juice, cola, salt and coffee on metal surfaces. These can cause indelible stains. To remove black marks on aluminium chair legs, products especially made for steel finishes or non-abrasive car polishes are recommended.

FABRIC COVER

Kartell uses different kinds of covers, for each one you may find the appropriate cleaning and usage instructions within the instruction card enclosed in the packaging.

product charts

FABRICS

CUSTOMER FABRIC

CUSTOMER FABRIC COM (CUSTOMER OWN MATERIAL)

The amount of fabric indicated for each model refers only to plain, self-coloured material in 140 cm width, without any defects.

The minimum order amount for this programme is as follows:

- 1 piece for sofas and armchairs;
- 4 pieces for chairs.

The feasibility of covering the requested product with COM is subject to verification by Kartell SpA of a sample of fabric to be sent together with the order.

Simply send a COM sample no smaller than A4 size (210 x 297 mm).

The use of any material that is not 140 cm wide, or of any fabric that is not plain and self-coloured, is subject to authorisation by Kartell SpA and in such cases the company may request a larger quantity than that indicated on the list.

The client must clearly indicate any particular cuts to be made, plus the direction of stripes or decorative parts.

Kartell SpA approval of the material provided by the Client is limited only to the production of the upholstery. Kartell SpA therefore declines any responsibility relating to resistance to wear, fire resistance or other technical characteristics of fabrics provided by the Client.

Kartell S.p.A. is in no way responsible for customer-supplied materials, for any defects or technical shortcomings of such materials, for any possible defective reactions on the upholstered product or for care and washing instructions.

SHIPPING OF CUSTOMER OWN MATERIAL

The sample of customer own material ("COM") and the fabric required for the production of the items ordered must be sent to us with delivery duty paid (DDP) complete with all the instructions required to identify the material, the order and the model it refers to.

The material should be sent to the following address: Kartell S.P.A., Via Delle Industrie, 1 – 20082 Noviglio (Milan)

DELIVERY TIMES FOR CUSTOMER OWN MATERIAL ORDERS

Orders are generally available within 4 weeks of receipt of the material, unless otherwise indicated due to the particular characteristics of the fabric and, in any case, subject to technical feasibility.

IMPORTANT: indications regarding amounts of material required are not valid for customer own leather ("COL"). For further information, please contact our Sales Office.

Kartell has decided to include the innovative Aquaclean® fabric, which can be cleaned with water and contains no PFC, a substance contained in most stain-resistant fabrics which pollutes the environment and is harmful to health.

This ecological fabric has a structure designed to simplify cleaning and strength, reducing the risk of accidental tearing sometimes caused by our pets. It is also subject to Safe Front treatment, which prevents the proliferation of bacteria and dust mites.

Certifications FSC™

2025 was a year in which we were faced with major commercial and industrial challenges that required rapid decision-making and a constructive approach. By adopting a strategy of sustainability in our company management, we were able to cope with all the unexpected scenarios that impacted global markets, from macro-economic upheavals to serious geopolitical events.

We remain committed to innovation and to driving change. Our vision for the future cannot be separated from our values: we shall continue to prioritise ethics in our work and our commercial relations. We are determined to remain a key player by ensuring positive and lasting social development. We believe in a growth model that merges sustainability, research and excellence. Thanks to the choices we make daily, we create value that has a positive impact on our entire supply chain, from our material and technology suppliers upstream to our partners downstream, who promote the name of Kartell in shop windows around the world.

Our story is strengthened by the commitment of three generations and bears witness to the lasting power of a vision guided by clear values. Our journey of continuous growth is built on trust, innovation and the extraordinary ability of Kartell and its creative workshop to forge

strong links between people. Our mission is to promote the importance of design through lasting, sustainable development.

This year we have worked hard on our products, on their evolution and on our distribution model, and have reached many important new milestones on the road to social and environmental sustainability. We have put new procedures in place in the design and production phases and in quality control to respond to the latest legislative challenges. We have also applied new supplier quality control protocols and extended our application of specific certifications.

On the subject of materials, we continue to invest in converting all our products to recycled, recyclable and easily separable materials to facilitate raw materials management at the end of the product life cycle.

On the distribution front we are determined to consolidate our all-channel model, to grow our sales network and to expand our global presence through solid strategic partnerships. We have set ourselves ambitious targets but we have a team that is able to reach them. We therefore look to the future with confidence, in the conviction that whatever challenges lie ahead will stimulate us to continue working and growing together.

DESIGN... BEAUTIFUL, INNOVATIVE AND FOR EVER

WE DEFEND BEAUTY AND RESPECT PEOPLE

Kartell products are timeless, produced with the utmost respect for the environment and destined – at the end of their life – to find places in museums and private collections.

They are not just beautiful but beautifully made, the result of a production process that seeks perfection, considers even the smallest detail and prepares for possible future changes. **Our corporate strategy is based on ethical production, transparent financial management and the economics of beauty.**

FOR THE GOOD OF PEOPLE AND THE PLANET

For Kartell, “eco-friendly” is more than a catch-phrase: it is a practical commitment, underscored by certifications like Greenguard, which confirms minimal emission levels, and the ISO 9001 and ISO 14001 international product and process certifications. **Kartell products are timeless.**

CIRCULAR ECONOMY

Kartell fulfils its commitment to environmental sustainability through innovative designs that serve the regenerative economy. We use recycled materials whenever technology permits, and our industrial production processes generate neither waste nor emissions. **We invest in continuous research into new materials and production processes.**

RESPECT FOR THE ENVIRONMENT AND SUSTAINABILITY

Respect for the environment is and has always been one of the key elements of our brand’s DNA. Our commitment is expressed through “Kartell Loves the Planet”, the industrial manifesto in which Kartell places environmental responsibility and good sustainability practices at the heart of all activities, starting with the working environment.

SOLIDARITY AND TRAINING PROJECTS

Thinking of future generations

The “Kartell Loves the Planet” industrial manifesto extends our sustainability commitment to social solidarity, and in particular to the education of young people in needy countries. Kartell collaborates with universities and educational institutes on projects that combine creativity with the capacity to ensure sustainable marketing and design activities.

WOOD

Kartell's wood products are FSC™ certified. FSC certification is internationally recognised as the forest management system that has the most positive impact not only on forests but on the market and on people too. The FSC mark on our products tells you that the raw wood materials from which they are made are sourced through a supply chain that rigorously respects the environmental, social and economic standards required by the Forest Stewardship Council™, the international NGO that has been promoting responsible forest management for over 25 years. Since the wood we use is a natural material, it may display differences in colour and grain. These variations are typical of real wood.

Ask for FSC™ C149322 certified products.

RECYCLED

The recycled thermoplastic technopolymer used for these products is derived from pure waste that is uncontaminated by other materials. This material allows us to recycle waste while guaranteeing the top-quality appearance and structural strength required of our finished products and reducing the emissions generated by the production process. It also enables Kartell to pursue a complementary road towards environmental sustainability by using recycled material in a way that removes waste from the environment and turns it into raw material in a virtuous process of the circular economy. Thanks to the industrial processing of this recycled material, Kartell has been granted use of the Second Life Plastic label by the Institute for the Promotion of Recycled Plastic. The SLP label certifies that the objects concerned are produced from plastic waste in a circular economy process that emphasises quality and traceability.

BIO

This mark identifies a material derived from byproducts of agriculture that does not compete with the production of food for people or animals. Waste is broken down in a biological process by natural micro-organisms to produce a biomass similar to plastic. After a series of other processes to refine it, this biomass becomes a top-quality raw material. Kartell was the first company in the furniture industry to experiment with this material in the injection moulding process typically used to form plastics. The material used for our Bio collection boasts unique characteristics of biodegradability in water and soil, as certified by prestigious international institutes of the calibre of Vinçotte Belgium and TÜV Austria.

STONEWARE

Thanks to collaboration with partners of excellence, from whom we source our marble-look stoneware, the ceramic surfaces found in our collections are made in special processes that use the latest, most innovative technologies to reduce and compensate for emissions. Until technical innovation allows emissions to be completely eliminated, our partners have voluntarily chosen to compensate for the CO² emissions generated in the production of our CarbonZero collections by supporting certified projects for the production of clean energy in developing countries. In addition, further industrial steps have been taken in conformity to the social and environmental standards imposed by B Corp certification. In particular, the decision has been made to reduce the thickness of materials from 10 mm to 9 mm. This has resulted in significant savings in energy and materials as well as further reducing CO² emissions. Thanks to cogenerators, photovoltaic systems and the purchase of certified renewable electrical energy, between 2012 and 2023 Kartell avoided the emission of 152,845 tons of CO², equivalent to the CO² absorbed by 89,645 trees or 632 hectares of forest.

POLYCARBONATE 2.0

Polycarbonate 2.0, which is used exclusively by Kartell, is a material that combines use of a renewable, second-generation polymer obtained from cellulose and paper waste with an ISCC (International Sustainability and Carbon Certification) production process. ISCC was one of the first schemes put in place in Europe to promote sustainability throughout the supply chain in the renewable energy sector. Today it is one of the most popular and acclaimed forms of certification. The many advantages of polycarbonate, i.e. its high resistance to impact and fire, and in its excellent elasticity and mechanical properties, facilitate recycling and are fully maintained in the 2.0 version of the material.

RECYCLED ILLY

In keeping with our commitment to maximise the use of recycled materials, we recently launched a project to recover reject plastic capsules of illycaffè Iperespresso and transform them into a top-quality secondary raw material. Kartell's regeneration process grinds the plastic down into the granular form needed for injection moulding. The process removes reject coffee capsules from the production process and turns them into durable assets and objects of design. 400 Iperespresso capsules are used to make one chair.

CARB CERTIFICATION

To reduce emissions from wood composites in indoor furniture and furnishings, all our products that contain wood-based panels are made from certified materials that conform to the emission limits established by CARB (California Air Resource Board) and TSCA Title VI (Toxic Substances Control Act) standards. The indoor tables in our TOP TOP, FOUR, MAUI, MAX, MULTIPLO, GLOSSY, VISCOUNT OF WOOD and LUNAT lines are all CARB certified.

RECYCLABILITY

Recyclability, sustainability and ecological compatibility – in short, respect for the environment – are all central themes in Kartell's product development strategy. Our commitment to recyclability begins at the design and production stages. To simplify subsequent recycling, the different parts of Kartell products can all be separated easily into single-material components. The plastic parts of all our products are clearly marked to identify the material from which they are made and to permit correct recycling.

RECYCLED PMMA

The key characteristics of PMMA are its high rate of light transmission, excellent resistance to atmospheric agents, low weight, good workability and ease of thermoforming. Kartell has always used PMMA. Two years ago we introduced recycled PMMA obtained from plastic waste from various sources, depolymerised in a complex industrial process that returns the PMMA to its original monomeric state ready for processing. Recycled PMMA retains the aesthetic quality and structural strength of the pure new material. Its use gives industrial plastic waste a new lease of life and turns it into products that will stand the test of time as design icons.

RE-TEXTILE

Some of the materials we use in our armchairs, sofas and carpets are derived from recycling. PET bottles, for example, are transformed into polyester while old fishing nets are regenerated and turned into fabrics. This virtuous process is in perfect keeping with our policy of using recycled and recyclable fabrics whenever possible.

GREENGUARD CERTIFICATION

In 2014, Kartell obtained GREENGUARD certification for its dedication to the health of end users. When you purchase a GREENGUARD certified product, you know that it has been thoroughly tested and demonstrated to be non-polluting and non-hazardous. GREENGUARD certification is required by many ecologically sustainable building certification schemes around the world (such as LEED, CHPS, ASHRAE, Green Globes; NAHB; IGCC and CONSP). Certified categories: all Kartell's GREENGUARD certified products can be found on the UL SPOT website <https://spot.ul.com>.

PACKAGING

Our packaging consists mainly of recycled and 100% recyclable material. Environmental sustainability means avoiding waste and incorrect waste disposal. For further information on the recyclability of all our products, visit www.kartell.com.

CERTIFICATIONS ISO 9001:2015

CERTIFICATIONS ISO 14001:2015

COMPANY QUALITY CERTIFICATION: ISO 9001

In 1996, Kartell decided to certify its Corporate Quality Management System in compliance with UNI EN ISO 9001:1994 standards. In 2005, the company aligned its Quality Management Systems with the standard UNI EN ISO 9001: 2000. In 2008, the company renewed its ISO 9001:2000 certification. And, in 2010, it switched to UNI EN ISO 9001:2008. During 2017 Kartell updated its certification standard to UNI EN 9001:2015.

A guarantor for this certification process is the I.I.P. (Italian Institute of Plastics), which is itself accredited by SINCERT and CISQ, the Italian federation of accreditation bodies for Quality Management Systems. CISQ is part of IQNET (International Certification Network), a supranational body which guarantees mutual recognition of the ISO standard in countries worldwide.

The attainment and maintenance of this certification, made possible by the commitment and perseverance of all company offices involved, testifies to the continued research into ever higher levels of quality in company management systems.

A copy of the Quality Certification is available for downloading on www.kartell.com

ISO 14001 CERTIFICATION

In 2011 Kartell achieved UNI EN ISO 14001: 2004 certification for its support of an effective Environmental Management System, an international standard recognised throughout the world and developed about 10 years ago which defines development and implementation parameters in corporate processes in order to achieve an effective environmental management system.

WHAT IS ISO 14001?

This certification attests that the organization certified has implemented a management system capable of controlling environmental impact in its own business and systematically endeavours to improve it in a sustainable, effective and consistent manner. ISO 14001 certification is not obligatory but is the result of the voluntary choice of the Company which decides to define, implement, maintain and improve its own environmental management system.

During 2017 Kartell updated its certification standard to UNI EN ISO 14001:2015.

A copy of the Quality Certification is available for downloading on www.kartell.com

UNI LIST
TECHNICAL REFERENCE STANDARDS

Food contact standards

Each page of the price list is dedicated to a product that has been tested in accordance with current regulations which are summarised in a table where the left hand column shows the code and/or paragraph of the test to which the product was subjected and the right hand column shows the test results and the levels attained. The specification of each regulation is show below:

LIST OF UNI TESTS
FOR CHAIRS:

UNI standard 8582/84 - 1022/98
stability test

UNI standard 8584/84
fatigue test for chair frame

UNI standard 8585/84
impact test for seat

UNI standard 8586/84
test for resistance to repetitive impacts

UNI standard 8587/84
fatigue test for chair back

UNI standard 8589/84
test for arm resistance to vertical force

UNI standard 8590/84
test for arm resistance to horizontal force

UNI standard 8591/84
duration of the rotation of the seat

UNI standard 9083/87
drop test

UNI standard 9088/87
test for resistance of legs to side stress

UNI standard 9089/87
impact test for back and arms

UNI EN standard 10977:2002
Furniture for home and collective use - Seating

LIST OF UNI TESTS
FOR TABLES:

UNI standard 8592/84
stability test

UNI standard 8593/84
test for resistance of tops to concentrated loads

UNI standard 8594/84
top bending test

UNI standard 8595/84
structural strength test

UNI standard 9085/87
drop test

UNI standard 9086/87
impact test for legs

UNI EN standard 1729-2:2006
Furniture - Chairs and tables for schools.Part 2:
Safety requirements and test methods

UNI ENV standard 12521:2001
Home furniture - Tables - Mechanical and struc-
tural safety requirements

UNI EN 527-1:2011
Office furniture - Work tables and desks.Part 1:
UNI EN 1022:2005 dimensions. Home furni-
ture - Seating - Stability test

UNI EN 15372:2008
Furniture - Strength, durability and safety
Requirements for tables for non-home use

UNI EN 12521:2009
Furniture - Strength, durability and safety
Requirements for tables for home use

LIST OF UNI TESTS FOR STORAGE
UNITS AND BOOKCASES:

UNI standard 8596/84
stability test

UNI standard 8600/84
bending test under a concentrated load

UNI standard 8601/84
top bending test

UNI standard 8606/84
maximum total load test

LIST OF UNI-EN TESTS
FOR STEPS:

UNI-EN standard 131-1/94
functional dimensions of the steps

UNI-EN standard 131-2/93
bending of the rungs and platform
Standard EN 1728:2000 took effect in 2002 (UNI EN 1728:2002 in Italy) harmonizing at the European level testing methods for resistance and durability of all the types of domestic seat- ing. This regulation, which replaces previous ones, prescribes much more severe testing pro- cedures than in the past.
Standard EN 15373 came into force in late 2007, updating the testing criteria, cycles and levels, with respect to EN 1728:2000.
Standard EN 16139:2013 came into force at the end of 2012, updating standard EN 15373 (see summary table).
In 2013, standard EN 1728 was updat- ed to the EN 1728:2012+AC:2013 edition (in Italy UNI EN 1728:2012+AC:2013).
Standard EN 1730:2000 updated with EN 15372:2008 (for Italy UNI EN 1730:2002) came into force in 2000 for the assessment of table performance took effect in 2000 to determine table performance. This stand- ard stipulates the testing methods to deter- mine the resistance, durability and stability of all types of tables. Tests are conducted on an assembled and ready-to-use table. The referenc- es to the characteristics tested are expressed with respect to the paragraph in the standard, as follows:

UNI EN standard 15373:2000
paragraph 5.1 - 5.2
General safety requirements

UNI EN standard 1022/2005
Stability

UNI EN standard 1728/2000

paragraph 6.2.1
static load on the chair back

paragraph 6.2.2
static load on the front edge of the seat

paragraph 6.5
static horizontal load on the arms

paragraph 6.6
static vertical load on the arms

paragraph 6.7
resistance to fatigue of the seat/backrest

paragraph 6.8
resistance to fatigue of the front of the seat

paragraph 6.10
resistance to fatigue of the arms

paragraph 6.12
static load on the front legs

paragraph 6.13
static load on the side legs

paragraph 6.15
impact on the seat

paragraph 6.16
impact on the backrest

paragraph 6.17
impact against the arm
paragraph 6.21
resistance of footrest

UNI EN standard 1728/2012

paragraph 6.4
Static load on the chair-backrest

paragraph 6.5
Static load on the front edge of the seat

paragraph 6.6
Static vertical load on the backrest

paragraph 6.10
Static horizontal load on the arms

paragraph 6.11
Static vertical load on the arms

paragraph 6.15
Static load on the front legs

paragraph 6.16
Static load on the side legs

paragraph 6.17
Resistance to fatigue of the seat-backrest

paragraph 6.18
Resistance to fatigue of the front of the seat

paragraph 6.20
Resistance to fatigue of the arms

paragraph 6.21
Resistance of footrest

paragraph 6.24
Impact on the seat

paragraph 6.25
Impact on the backrest

paragraph 6.26
Impact against the arm

paragraph 6.27
Drop resistance

paragraph 6.27.1
Drop resistance for multiple seats

UNI EN standard 1730/2000

paragraph 6.2
horizontal static load

paragraph 6.3
vertical static load

paragraph 6.4
resistance to horizontal fatigue

paragraph 6.5
resistance to vertical fatigue
paragraph 6.6
impact on the top

paragraph 6.7
stability

paragraph 6.8
drop

For products intended for contact with food, the following reference standards are used for testing: Ministerial Decree of 21 March 1973 and subsequent amendments Regu- lation (CE) No. 1935/2004 for mate- rials and objects intended to come into contact with foodstuffs. Title 21 cfr. 1077.1460 of the Food and Drug Administration (FDA) – USA Article 16 of MHLW Food San- itation Law, Chapter III Specifica- tion for Apparatus and Containers and Packaging. Standard and Specification for Food and Food Additives, etc. (Ministry of Health and Welfare Notification No.370, 1959 & MHLW Notification No. 336, 2010), Section III. Equip- ment and Containers/Packages (Japan).

MEANING OF THE LEVEL TESTS, SUGGESTED USE:

STANDARD 16139:2013 LEVEL	STANDARD 12520:2010 LEVEL	STANDARD 10977:2002 LEVEL	STANDARD 15373:2007 LEVEL	SUGGESTED USE
-	-	1	-	Light domestic use
-	-	2	-	Normal domestic use
-	1	3	1	Heavy domestic use Light collective use
L1	-	4	2	Collective use: public areas, waiting rooms, restaurants, offices
L2	-	5	3	HEAVY COLLECTIVE USE: SCHOOLS, PRISONS, HOSPITALS

CERTIFICATIONS LIGHTING REGULATIONS

REFERENCE MARKS

CE – indicates the conformity of the products bearing the acronym with the essential requisites of European Community directives.

ENEC – the European trademark for high quality in electrical products which indicates conformity with current European regulations is recognised as the equivalent of the individual national trademarks in 20 European countries, signatories to the Lum Agreement.

ETL – American and Canadian trademark of quality for electrical products. It certifies product conformity with current American and Canadian regulations.

PSE – Japanese trademark of quality for electrical products. It certifies product conformity with current Japanese regulations.

NOM - Mexican trademark of quality for electrical products. It certifies product conformity with current Mexican regulations.

EK/KC – Korean trademark of quality for electrical products. It certifies product conformity with current Korean regulations.

UKCA – indicates the compliance of the products that bear this mark with the essential requirements of the directives in force in the United Kingdom.

CB Certificate (Australia and New Zealand)
Certification attesting product conformity with international IEC regulations, can be issued with specific national deviations.

CB Certificate – Certification attesting product conformity with international IEC regulations.

CCC – China Compulsory Certificate The brand certifies product compliance with Chinese standards and is mandatory for lighting products imported in China.

ECO-CONTRIBUTION

Introduced in Legislative Decree no. 151 dated 25 July 2005 (updating directives 2002/95/EC, 2002/96/EC and 2003/108/EC), the eco-contribution is an environmental charge used to pay for waste management of electrical and electronic equipment (WEEE). This charge is used to finance all phases of treatment, transport, recovery and disposal of electrical and electronic appliances. Kartell lighting prices include the WEEE.

NOTICE PURSUANT TO ARTICLE 13 OF LEGISLATIVE DECREE NO. 151 DATED 25 JULY 2005.

Directive 2012/19/UE (waste electrical and electronic equipment: WEEE):
User information: pursuant to article 13 of Legislative Decree no. 151 dated 25 July 2005, no. 151 "Updating of Directives 2002/95/EC, 2002/96/EC and 2003/108/EC, regarding the reduction in the use of dangerous substances in electrical and electronic equipment, and the disposal of waste" this product is conform.

The barred bin symbol on the equipment or their packaging indicates that at the end of its useful life, the product must be disposed of separately from other waste. The user must take the equipment to an authorised recycling centre for electronic and electric waste, or return it to the original vendor when purchasing an equivalent product, on a one-to-one basis. The appropriate collection for environmentally-compatible

recycling, treatment and disposal contributes to avoiding possible negative effects on the environment and its health and encourages the reuse and/or recycling of the materials used in the equipment. Improper disposal of the product by the user will result in the application of the administrative sanctions stipulated by regulations in force.

ECODESIGN FOR LIGHTING

In response to current legislation, Kartell is working hard to bring its lighting products as closely as possible into line with the parameters established by the ECODESIGN directive.

The EU Ecodesign Directive establishes a framework under which manufacturers of energy-using products are obliged to reduce the energy consumption and other negative environmental impacts occurring throughout the product life cycle (production, use and disposal).

In particular, the regulation requires that light sources and their power supplies permit access for technical checking and that they be "disassemblable" to permit repair in the event of failure. Light sources must also be "replaceable" to permit upgrading or the installation of more efficient or improved components as these become available in future.

GENERAL TERMS AND CONDITIONS OF SALE

CUSTOMER CARE

I. SCOPE

1. These General Terms and Conditions govern sales contracts entered into by Kartell S.p.A. ("Kartell") and its clients, professionals that purchase and resell ("Client") the Goods presented in the Kartell catalogue ("Goods"). The General Terms and Conditions of Sale may be waived or modified only through a written agreement between Kartell and the Client.

II. ORDERS

1. Each Product order constitutes an irrevocable offer by the Client. Kartell reserves the right at its sole discretion, to accept, modify or refuse orders at its sole discretion, or to suspend delivery should the Client not provide Kartell with guarantees for the request and not respect the sales guidelines issued by Kartell from time to time.

2. Excluding purchases made for specific purposes agreed in advance with Kartell or in the "contract" channel, the Goods may only be resold retail at the sales point indicated to Kartell.

III. PRICE

1. Unless otherwise agreed, the prices of the Goods indicated in the price list are ex works for deliveries within the European Union, and ex Kartell warehouse for deliveries outside the European Union.

2. The minimum amount of each order for delivery inside Italy is €400.00 (four hundred euros) excluding VAT, and €500.00 (five hundred euros) excluding VAT within the European Union. Should the order not reach this amount, the order may be accepted with a minimum additional charge on the Client invoice of €30.00 (thirty euros) in the first case, and €50.00 (fifty euros) in the second case as a "partial contribution to expenses".

3. The price applied to the Goods is that in force at the order date. VAT must be added to the prices indicated in the price list (minus any discounts) in accordance with the law.

4. Kartell reserves the right to modify the price of the Products indicated in the price list, at any time, as a result of events that determine an increase in production costs, by way of non-limiting example, an increase in the costs of (i) raw materials, (ii) transport, (ii) labour, (ii) energy, etc., or any other factor relating to production dynamics. It is understood that any changes in the price of the Products shall not in any way affect orders finalised before the entry into force of such price changes.

IV. OWNERSHIP

1. Pursuant to Articles 1523-1526 of the Italian Civil Code, ownership of the Goods will be transferred to the Client only upon full payment of the price. In the event of hire purchase and Client default, Kartell shall retain any instalments already paid by way of compensation, without prejudice to claims for greater damages.

V. PAYMENTS

1. Payment is considered to have been made only when Kartell is in possession of the

amount. In the event of payment by cheque or other method, the payment method must be considered to be accepted subject to payment in due course.

2. However, order payment may not be suspended or delayed due to Client claims or defences regardless of ownership, nor may the Client offset debits and credits with Kartell.

3. In accordance with Article 1186 of the Italian Civil Code, failure to pay or partial payment of any amount owed to Kartell shall automatically place the Client in default with the resulting expiry of the time limit and Kartell's simultaneous right to suspend deliveries, refuse or cancel orders, modify sales conditions and take action to ensure full payment of the credit, in addition to expenses, interests and damages. Late payment will also result in the automatic application (with no prior notice) of late interest at the rate established by Article 5 of Legislative Decree 231/2002.

VI. DELIVERY

1. The delivery date is purely approximate and non-binding, with Kartell being entitled to make partial deliveries.

2. Should delivery be delayed as requested by the Client, Kartell reserves the right to charge monthly warehousing and/or handling expenses equal to 10% (ten percent) of the amount indicated on the invoice, beginning in the month following notice to the Client of the Goods' availability.

3. Any Product order cancellation or rejection at receipt will result in the application of a penalty on the Client of 30% (thirty percent) of the amount indicated on the invoice, without prejudice to claims for greater damages.

4. Should the Goods be shipped outside EU territory, the Client must provide Kartell all documents certifying Product delivery within one (1) month. Should the Client fail to do so, Kartell reserves the right to charge the Client all expenses incurred to complete the sale operation.

5. At delivery, the Client must carefully inspect the quantity and condition of Product packaging. On pain of forfeiture, any obvious defect must be: (i) reported in writing to the shipper at the time of delivery, indicating expressly on the consignment note "conditional acceptance", and (ii) promptly reported in writing to Kartell within 48 (forty-eight) hours of delivery, in compliance with the instructions below.

6. Any returns must be approved in writing in advance by Kartell: unauthorised returns will be returned to the sender along with delivery charges.

VII. GUARANTEE AND CLAIMS

1. The legal guarantee for the Goods begins, as per Article 1495 of the Italian Civil Code, on the date of acceptance of Product delivery by the Client or its representatives.

2. Any claim regarding the Goods (excluding those identified at the time of receipt and regarding shipping) must be made in writing to Kartell **within 8 (eight) days** of the discovery, and in any case **within**

12 (twelve) months of Product delivery acceptance by the Client or its representatives in compliance with the following procedure: (Par. 6. Claims)

3. With reference to the Consumer Code, Legislative Decree 206 of 6 September 2005, Articles 131 and 132, the Client loses and forfeits any right of recourse against Kartell if it does not notify Kartell in writing of an end-customer claim within 8 (eight) days of receipt of the end customer's complaint using the procedure described above.

4. Kartell shall not be liable for damages caused by improper use, tampering, normal wear or failure to respect the assembly and maintenance instructions included in the product card, or component modifications or replacements with others not in accordance with the original specifications.

5. In any case, Kartell's liability is limited to the value of the defective goods: Therefore, Kartell may not be held liable, among other things, for expenses sustained by the Client or end customer or for any other damage claimed (direct or indirect).

6. **The bulbs contained in the packaging of each lamp are supplied by Kartell as a courtesy in order to provide the best service to our customers.** However, since these accessories are not directly manufactured by Kartell but supplied by external suppliers, Kartell does not guarantee their correct function. In case of bulb fault or failure, it is the customer's responsibility to replace the bulb, in compliance with the technical information in the catalogue, in the dedicated section, or in the instruction booklet enclosed with the product, to which reference is made in full, and for which Kartell assumes no liability.

VIII. COMPETENT COURT

1. Any disputes arising directly or indirectly from the contractual relationship are the exclusive competence of the Milan court.

2. Applicable law is substantially Italian (excluding any application of foreign laws).

CLAIMS

MADE ON DELIVERY

Should any of the following conditions arise on delivery of our products:

- a) one or more of the products listed on the accompanying document is missing;
- b) one or more of the products delivered differs from those listed on the accompanying document;
- c) the packaging is damaged, as shown by the impact detector; then you must:

1. Write on the accompanying document (carrier's copy and addressee's copy) that the goods are accepted with reserve. Provide clear written details of the problem encountered. A generic note is not sufficient to ensure correct handling of the claims process.
2. Compile the transport claim form in all its parts. This form (reproduced below) can be obtained from your local Kartell agent or from the Kartell Sales Office, email **transport@kartell.it**
3. Send the accompanying document and the transport claim form to Kartell within 48 (forty-eight) hours of receiving the products.

CLAIMS

FOR NON-CONFORMITY OF PRODUCTS

To submit a claim for product non-conformity, scan the QR code below and follow the WebUP procedure:

<http://b2b.kartell.it:8080/WebUP/views/web/webuplogin.jsf>

This procedure involves the following steps:

1. Compile the product non-conformity claim form in all its parts.
 2. Attach photos showing the non-conformity reported (at least one photo per non-conforming product).
 3. Some products have a special label known as an impact detector. If this has been activated (red) or has been torn:
- Refuse to accept the package from the carrier and follow the procedure given in the 'Claims made on delivery' section.
 - Alternatively, check the contents of the package in the presence of the delivery driver.
 - If the product inside is undamaged, you may accept it.
 - If the product is damaged, refuse it, write a clear reason for refusal on the carrier's copy of the accompanying document, then begin the 'Claims made on delivery' procedure.

If the claim concerns a **NEW PRODUCT** just received by a customer or delivered by a customer to an end user, send the following to Kartell immediately:

- Photos showing the package in its entirety.
- Photos of the two labels/barcodes.
- A photo of the impact detector, if present.
- A photo of the (red) quality control card.
- A photo of the product.
- A video showing the defect (in appearance or function).

Keep the Quality Control card included in the product folder as this provides essential infor-

mation that Kartell's Customer Care Office may require if it is deemed necessary to perform checks on the production lots affected by the non-conformity. **Keep the original product packaging even after you have sent the documentation listed above** as our Quality Control Office may ask you to return it for analysis. Kartell shall only consider claims made according to this procedure and accompanied by all necessary documentation.

Kartell will be unable to process your claim if any of the necessary documentation and/or the original packaging is missing, or if you fail to follow the procedure given above.

If the claim concerns a **USED PRODUCT** (i.e. one sold to an end user and already used), submit the following documentation:

- A video/photo showing the malfunction/defect in the product.
- In the case of lamps with a dimmer or LED module, a photo of the silver/electrical specifications and test label.
- In the case of chairs, a photo of the date label under the seat.

Kartell shall only consider claims that are accompanied by all necessary documentation.

Kartell will be unable to process your claim if any of the necessary documentation is missing, or if you fail to follow the procedure given above.

If you need to communicate with Kartell's Quality Control Office, please write to the following e-mail address:

quality@kartell.it

Kartell assumes no responsibility for damage, defects or faults caused by or in any way deriving from transport or deliveries not arranged directly by Kartell through its agreed carriers. Kartell strongly recommends the use of carriers of proven experience to ensure the necessary high level of service.

This catalogue was printed using 100% self-generated electricity produced using photovoltaic panels and other renewable sources.

The inks used for the printing process are vegetable-based and mineral oil-free. The oil carrier in which the coloured pigments are dissolved is obtained from specially cultivated plant seeds, further limiting CO₂ emissions. The use of solvents and additives containing VOCs (volatile organic compounds) has been eliminated from the entire printing process.

This catalogue is printed on "Magno Volume", a high-quality coated fine paper made exclusively from virgin cellulose fibres. Produced using ECF/TCF bleaching processes without elemental chlorine, it is fully recyclable and awarded the EU Ecolabel for its reduced environmental impact. Magno Volume is manufactured in compliance with the strictest European regulations on chemical safety, ensuring a responsible and sustainable choice for premium printing; 100% recyclable and FSC® certified for the responsible management of the world's forests.

The printing presses used are CO₂ Neutral certified, and the printer offsets the inevitable additional CO₂ emissions associated with the production process with reforestation activities managed by Rete Clima.
