Information:

VS is one of the leading school furniture manufacturers in Europe. In more than a century of company history, VS has made many significant contributions to the development of school furniture. As a complete supplier with a wide range of products, we offer comprehensive furnishing solutions from a single source.

Company guidelines

- We manufacture furniture in accordance with the highest quality requirements, organising production along holistic and environmentally aware lines so as to impinge on natural resources as little as possible.
- We utilise natural raw materials so as to have the smallest possible impact on the environmental balance sheet. Our production processes are safe and environmentally compatible, and waste from production is responsibly disposed of. We recycle wood, steel, plastics and other used materials.
- Our entire production is continuously monitored so as to ensure the lowest possible pollutant emissions and consumption of raw materials.
- We manage our energy consumption as efficiently as possible, optimise our use of raw materials and by choice use regenerative forms of energy. Quality and environmental standards
- Quality management system DIN ISO 9001, environment management system in accordance with DIN ISO 14000:2005.
- VS products are tested by external test institutes like GS symbol for tested safety.
- "Pollutant-tested" environment certificates and GREENGUARD
- "FEMB level 3" European Sustainability Standard according DIN EN ISO 14024 Type I
- Guarantee time: 3 years

Please note:

The prices shown in this list do not include any kind of packaging cost e.g. export or pallet packaging, that a shipment to your country may need. Please consider that these can be added by request.

Shift+ Up

Multipurpose unit which can be used as a platform, table or bench. Stage-like landscapes of a maximum of two levels can be created from the rectangular and triangular elements. Centre distances matching the storage room units and mats of the Shift+ series. Frame made from circular steel tubing with all-round rectangular tube edge. The legs are equipped with conical stacking and glide elements and can be securely stacked on top of one another up to a height of two using a spring buffer. Elements located next to one another (max 20 sqm) must be linked together using a flexible rotary connector. Optionally with guide for plastic Grattells boxes. Tops made from plywood. One side with anti-slip screen-printed structure for standing on and the other with a smooth surface for use as a table or for writing. The top can also be turned without the need for any tool. The sides can be closed off with an insertable panel for use as a stage. Transport cart for the tops and the elements inserted in one another.

LiteTable-ST

Frame made from welded round tubular steel legs with all-round rectangular tubular steel top frame, all powder-coated. Because the inner and outer legs are arranged in pairs, the table is stackable (ST). Tables can be stacked thanks to the inner and outer legs arranged in pairs. However, depending on how they are turned, they can be arranged in rows without gaps. The top frame is equipped with stacking and gliding protection. Table top with LIGNOpal top and continuous, molded (PUR) polyurethane safety border or LIGNOpal top and glued (KU) plastic border. Tops with KU border available with edged or rounded corners as required. Fixed height in 40, 53, 59, 64, 71, 72, 74, 76, 82 cm in accordance with EN 1729.

Welcome

Cloakroom system for kindergartens and primary schools with the “slippers in class” principle. System consisting of an optionally combinable wall panel with clothes hooks, a shoe cabinet and a wall cabinet. Wall panel made from 19-mm-thick melamine resin-coated chipboard with four black double hooks offset from one another. The hooks, which have been certified by the TÜV product testing authority are rounded and equipped with a curved top part to prevent injury. The wall panels are available in two heights, making them suitable for kindergartens and primary schools and each panel can be used by a maximum of eight children. Shoe cabinet consisting of a body made from melamine resin-coated chipboard with a central partition and two fixed, glued panels.

Shift+ Landscape low cabinet

Mobile and stationary shelving elements
Structure of glued linear and curved (60°) carcasses on a steel cross-member with 4 adjustable feet. Carcass made of melamine-resin-coated LIGNOpal chipboards with glued-on ABS edge. With glued middle partition. With rows of holes (25 mm) for adjustable shelf inserts and a perforated-plate back panel. Curved Landscape seating and cabinet elements can be combined linearly and, thanks to the matched inner and outer radius, back to back to create circular and serpentine seating/cabinet landscapes. Push-handles made of steel on the top of the carcass, magnets for linking and castors as option.
